Objective and Scope

The objective of this operating procedure is to define roles, responsibilities and lead times for SBS, CCT (Customer, Credit and Trade Service Line) CTC (Customs and Trade Control), to provide the service of partners manual screening to the GBUs.

Partners manual screening is done for:

- Projected partners, wherever located before prospection, bid, sale, order approval, issuance of any purchase order or signature of any agreement;
- Business transactions where there is no link to any trade control IT tool (the distribution site Med-Lab ERP SAGE, R&I Solvay centres).

The group policy is turned towards the best level of compliance and the solution to ensure that the GBU shipments are authorized is to manually screen the recipients against restricted party lists and economic sanctions.

Effective date

October 1, 2018

Reviewed date

August 20, 2020

1. Context

Solvay currently exports U.S., European and other Foreign produced materials from numerous Solvay locations globally. To prevent the sale or purchase of goods or services from or to a restricted party, it is Solvay's policy to screen business partners (for exports, re-exports, domestic transactions) against the various Governments published restricted party, sanctioned countries and products licensing requirements.

2. Screening frequency

SBS, CCT, CTC will provide screening assessment on demand within 48 hours.

The agreed screening frequency between Med-Lab and SBS and Solvay R&I centres and SBS is for new customers when an account is opened within 24 hours and for all other customers at least once every 12 months.

3. Operation sequence

Scope

Worldwide

Dow Jones

1. [Group Trade Compliance Program - Know Your Customer : Restricted Party Screening \(Page 28\)](#)
2. [End Use Policy Med-Lab](#)

The GBU sends the new account details at SBS CTC generic email address: trade.control@solway.com

Mandatory fields for an efficient screening:

1. full name of the recipient;
2. the country of destination;
3. the End Use Statement (if required) (see [Appendix 32](#)).

The GBU will have to check in advance whether the destination country is listed as a "country at risk", see [Appendix 07](#) of the Group Export Compliance Program (GECP). Any shipment to a country at risk will require a Compliance Statement, see [Appendix 11](#) of the GECP.

CTC Customs specialists perform screening of the account through Dow Jones' "Risk and Compliance" and "Factiva" solutions, which contains two main parts as follow:

- Sanctions Lists : more than 800 sanctions lists (UN, US and EU consolidated lists, Interpol, FBI, etc.) including ownership research and links to Politically Exposed Persons and Special Interest Persons.
- Adverse Media : more than 1 billion reliable news stories articles including 35 years of archives (over 42% is not freely available on the web) on corruption, financial crime, competition, human rights, and much more.

SBS, CCT, CTC answers back to the requestor's email and provides the approved/denied result.

The analysis includes:

- the partner screening report from Dow Jones with analysis in case of sanctioned partners;
- the Dow Jones [credentials](#) to access the adverse media news if any;
- the verification and approval/denial of the End Use Statement.

CTC Customs specialists perform batch screening of existing customers on Dow Jones Risk and Compliance at least every 12 months for both Med-Lab and Solvay R&I centers.

Any issues related to trade control has to be reported to the GBU Empowered Official.

For urgent request, outside of Portugal time zone (GMT+1) and which cannot wait a response time of 12 hours, GBU should contact CTC backup contacts as follows:

ZONES	SBS MEMBER	EMAIL	TELEPHONE
AMERICAS	Janice Sarmiento	janice.sarmiento@solway.com	001 (609) 6199 814
APAC	Cindy Xiong	cindy.xiong@solway.com	00862 123 502 299
	Teresa Liang	teresa.liang@solway.com	00862 123 502 123

CTC Process Expert audits the process once per year.

4. Roles and responsibilities
