

# Product Stewardship - REACH EU - (updated May 2025)

## WELCOME TO THE EU REACH PROJECT

REACH, stands for Registration, Evaluation and Authorization of Chemicals. It is the European framework chemicals Regulation that applies to all chemicals.

This Regulation aims to ensure the high level of protection of human health and the environment and applies to all substances on their own or contained in preparations or in articles.

Syensqo commits to fulfill REACH obligations for all our products and their applications through their activities of production, importation, marketing and use, according to the REACH timeline. In 2010, 2013 and 2018, Syensqo (Syensqo and Rhodia) successfully completed the 1st, 2nd & 3th REACH registration phases. This last phase (2018) involves chemical substances produced or imported in quantities between 1 and 100 T/Y.

### Why do Syensqo need to comply with REACH?

- REACH is a mandatory regulation; non-compliance can lead to heavy fines and even criminal sanctions (up to 2 years imprisonment)
- REACH compliance is in line with our "Syensqo Way" commitment
- Compliance is checked regularly via audits conducted by the Competent Authorities
- Syensqo can be jeopardized if our Suppliers do not comply with REACH
