

References Blueprints

Blueprint Type	Description
Cloud Integration Blueprint	Standardized architecture for integrating cloud applications.
Hybrid Integration Blueprint	Covers cloud-to-on-premise connectivity using secure channels.
Event-driven Architecture Blueprint	Defines real-time event propagation across systems.
Data Integration Blueprint	Covers bulk data movement, transformation, and replication.
B2B Integration Blueprint	Provides guidance for securely exchanging data with external partners.
User Integration Blueprint	Defines patterns for UI-based integration across applications.
IoT & Edge Blueprint	Provides architecture for connecting IoT devices to business systems.
