

LB - The L² Team

Team mission

Labwareizators: Our mission is to empower test requestors and lab analysts to effectively receive and conduct analytical tests requests by enhancing the efficiency, automation and user-friendliness of Labware, enabling seamless management of samples and tests. We aim to streamline and optimize data collection and management for laboratory experiments, to ensure data confidentiality, assisting R&I workers in capturing and sharing analytical test data.

The L² Team Jira Board: LIMS Labware Backlog/Product

This board is meant to track the development of the data ingestion through the LIMS Labware application.
