

LB - Nexora

Team mission

SyDatalab pioneers of the future of the web application for R&I data analysis by developing an intuitive, configurable, and customizable plug-and-play application. This tool allows R&I researchers to consult, search, and analyze data generated by Syensqo R&I labs, enhancing team collaboration, accelerating time to market, and reducing customer response times and experiment duplication. The web app streamlines lab data analysis, enhancing researchers' insights, efficiency, and innovation aiming for a full adoption rate that generates a *15% lab productivity improvement, 10% non-duplicated lab experiments*, and boosts the time to market by 5%.

Nexora Team Jira Boards ([Design](#) & [Dev](#)): SyDatalab Backlog/Product

These boards are meant to track the development of the visualization of the data coming from the R&I domain data ocean in GCP for Syensqo R&I Labs.
