STATEMENT ON THE STATUS FOR FOOD-CONTACT APPLICATIONS  
As specified below, the substances used to manufacture Solvay Specialty Polymers USA, L.L.C., a member of the Syensqo group, Radel® R-5000 CL 301 meets the requirements of Commission Regulation (EU) N°10/2011, which implements the framework regulation EU 1935/2004 of the European Parliament and of the Council of 27 October 2004 on materials and articles intended to come into contact with plastic materials and articles intended to come into contact with food and its subsequent amendments ("the framework Regulation"), as well as current GMP requirements set forth under the framework Commission Regulation (EC) 2023/2006 of December 2006 on good manufacturing practice for materials and articles intended to come into contact with food.  
All monomers used for the manufacture of Radel® R-5000 CL 301 resin are listed in the "Union list of authorized monomers, other starting substances, macromolecules obtained from microbial fermentation, additives and substances used in food contact materials" in Commission Regulation (EU) N°10/2011.

SYENSQO  
ADVANCING HUMANITY

June 7, 2024

STATEMENT ON THE STATUS FOR FOOD-CONTACT APPLICATIONS

As specified below, the substances used to manufacture Solvay Specialty Polymers USA, L.L.C., a member of the Syensqo group, Radel® R-5000 CL 301 meets the requirements of Commission Regulation (EU) N°10/2011, which implements the framework regulation EU 1935/2004 of the European Parliament and of the Council of 27 October 2004 on materials and articles intended to come into contact as related to plastic materials and articles intended to come into contact with food and its subsequent amendments ("the framework Regulation"), as well as current GMP requirements set forth under the framework Commission Regulation (EC) 2023/2006 of December 2006 on good manufacturing practice for materials and articles intended to come into contact with food.

All monomers used for the manufacture of Radel® R-5000 CL 301 resin are listed in the "Union list of authorized monomers, other starting substances, macromolecules obtained from microbial fermentation, additives and polymer production aids." (Annex 1 to Commission Regulation (EU) N°10/2011).

Please be advised that this formulation does contain colorants. Colorants used in plastic materials and articles are not subject to the positive list requirements of the Plastics Regulation unless they are listed on the Plastics Regulation (as is the case with carbon black).

Specific migration limits must be met by the final articles coming into contact with food for the following monomers and additives:

| Reference No. | CAS No.   | Substance Name               | SML                                                               |
|---------------|-----------|------------------------------|-------------------------------------------------------------------|
| 16000         | 92-88-6   | 4,4' Biphenol                | 6 mg/kg                                                           |
| 15610         | 80-07-9   | 4,4'-Dichlorodiphenylsulfone | 0.05 mg/kg                                                        |
| 411           | 1333-86-4 | Carbon Black                 | Refer to EU 10/2011 directive for restrictions and specifications |

Final articles must also be checked for overall migration limit which may not exceed 60 mg/kg of food or 10 mg/sq dm of surface area of article. Please be advised that Solvay Specialty Polymers has not conducted any migration testing to determine if our resin meets these migration limits.

Please be aware of Commission Regulation (EU) No. 2020/1245, which amends and corrects Regulation (EU) No 10/2011 and was effective September 2020. A risk assessment has been performed on Radel® R-5000 CL 301 in order to determine compliance with Art. 3 of Regulation (EC) 1935/2004. Such assessment was made

## Is there a report listing all ADL accessible for download on C&C

If the Agency Data Listing is present in the report it means it is shard with "20. ADL for Sales Reps" and therefore accessible for C&C users

| Report: Content Report<br>ADL Document Visible in C&C                                                                           |                        |           |                 |                                                      |                     |                     |                    |
