

Header and first column always visible

Definition

To optimize the user experience when users are navigating in the table, the first column and the first row are sticky. Users are thus always able to read the headers and titles when scrolling through the table.

Jira Issue

[LB-5110](#) - [Authenticate](#) to see issue details

Use case

- **Given** that the user can access the table on the workflow page
- **When** he scrolls down on the table
- **Then** the first column and first row remain visible
