

BFC Perimeter

Definition of the BFC Perimeter

A BFC perimeter is a group of companies managed in PF2, PI2 or WP2.

Some companies belong to Solvay, to Syensqo or may have been sold to another group.

The main BFC perimeters are:

- Perimeter **SOLVAY**:
 - SOLP: Perimeter maintained in PF2/PI2
 - SOLW: Perimeter maintained in WP2
- Perimeter **SYENSQO**:
 - SYEP: Perimeter maintained in PF2/PI2
 - SYEW: Perimeter maintained in WP2

You can display all existing BFC perimeters using the table **ZZF_BFC_CONS_PER - BFC : consolidation perimeter**

Display companies included in each BFC perimeter

Each BFC perimeter is a set of companies that can be displayed with **GS 03 - Display Set**

- The set of companies **ZZF_BFC_BUKRS_SOLP** & **ZZF_BFC_BUKRS_SYEP** are maintained in PF2 but can include companies managed in WP2
- The set of companies **ZZF_BFC_BUKRS_SOLW** & **ZZF_BFC_BUKRS_SYEW** are maintained in WP2 but can include companies managed in PF2

Ex: the BFC Perimeter SYEP = Set of companies **ZZF_BFC_BUKRS_SYEP** can be displayed in PF2 with **GS03 - Display Set**

Companies 0003, 2002, 2232, etc belong to the BFC Perimeter SYEP = **SYENSQO**

Table ZZF_BFC_CONS_MGT

All companies not included in the BFC Perimeter SYENSQO (SYEP & SYEW) are included in the table **ZZF_BFC_CONS_MGT** with their conso method.

The table **ZZF_BFC_CONS_MGT** is used to determine the conso method of a company code in some programs instead of the **Table ZZF_T001_MGT_V - Company codes** (for instance for the scope Syensqo, the determination of the **COPA movement type** in WP2 is done using the table **ZZF_BFC_CONS_MGT**)
