

BFC Perimeter

Definition of the BFC Perimeter

A BFC perimeter is a group of companies managed in PF2, PI2 or WP2.

Some companies belong to Solvay, to Syensqo or may have been sold to another group.

The main BFC perimeters are:

- Perimeter **SOLVAY**:
 - **SOLP**: Perimeter maintained in PF2/PI2
 - **SOLW**: Perimeter maintained in WP2
- Perimeter **SYENSQO**:
 - **SYEP**: Perimeter maintained in PF2/PI2
 - **SYEW**: Perimeter maintained in WP2

You can display all existing BFC perimeters using the table **ZZF_BFC_CONS_PER - BFC : consolidation perimeter**

Table ZZF_BFC_CONS_MGT

All companies not included in the BFC Perimeter SYENSQO (SYEP & SYEW) are included in the table **ZZF_BFC_CONS_MGT** with their conso method.

The table **ZZF_BFC_CONS_MGT** is used to determine the conso method of a company code in some programs instead of the **Table ZZF_T001_MGT_V - Company codes** (for instance for the scope Syensqo, the determination of the **COPA movement type** in WP2 is done using the table **ZZF_BFC_CONS_MGT**)
