

Product Safety (PRAPS) - Composition - (to be updated)

Subpages listing

- [Composition concepts](#)
 - [Other Compositions](#)
 - [Product Compositions](#)
- In EHS there is not one but many compositions. They serve different purposes:
 - tracking raw materials
 - have a breakdown by CAS # to determine which regulations apply to the product
 - filter only the substances that must be tracked for certain regulatory reportings
 - etc
 - Browse the pages to learn more about the different compositions.
 - Composition changes should be tracked and archived. In order to do so, we developed the [Composition Report](#) . Make sure you generate it every time you make a change to a composition.
