

Grid Mate plugin

On April 2025, we replaced the plugin Grid Buddy by a more modern and powerful one, called Grid Mate.

Based on the 2024 grids usage, we decided to migrate the following grids:

- Children Accounts
- Pricing Settings
- Bracket Pricing
- End Uses
- Contract
- Realized Sales
- My Opportunities without schedule
- Update schedules in my open opps
- Update stage dates in my open opps
- Pricing details
- Meeting report

Each new grid filters and settings are detailed in the next pages

This section will explain how to manage the accesses and how to maintain the grids

In case of doubt, you can refer to the official Grid Mate [Help Center](#)
