

# Project MuSigma - TLC: Release Notes

DRAFT

This document describe the changes for each release. It can be a link to the Jira or a simple release note page.

## Version Naming standard

This is the naming standard for version.

Major Version - Increment when changing to a new application framework.

Minor Version - Increment when adding new features into the application.

Bug Fixes Version - Increment when deploying bug fixes. When minor version is incremented, reset this to 0.

Timestamp - Indicate the timestamp whenever a deployment was released. Format: YYYYMMDD\_<<number of deployment on the same day in XX>>.

v<<MajorVersion>>.<<MinorVersion>>.<<BugFixesVersion>>.<<Timestamp>>

## Releases

If there is a JIRA released note, just replace this table with the URL to the JIRA.

Release Version	Notes	Released Date	Remarks
v0.1.0_20181015_01	Initial Deployment	2018-10-15
