

Team Progress

The team's work is organized around the Agile principles, and more especially the Scrum framework. Therefore, we work in cycles.

Here you can find the content of the Sprints, i.e. what we have been working during the previous Sprints, and what we are currently working on.

A Sprint last 2 weeks.

Sprint 2

01/04/2020 15/04/2020

Key	Summary	Status
SAV-171	As QlikSense developer, I want the three tables Users/Logs/Gudsis to be available in the Reporting file of BigQuery	TO DO
SAV-169	As Project Team, I want to implement an alerting system so as to make sure that the pipeline works as planned	TO DO
SAV-158	As project team I want to save the list of accounts with access to SolvIA so that we can address access management use cases	TO DO
SAV-148	As SolvIA domain Leader I want to save SolvIA logs on a monthly basis so as to study adoption	TO DO
SAV-141	As Team I want to retrieve technical users (and not filter them)	TO DO
SAV-140	As Team I want to retrieve Gudsis automatically so as to support industrialization	TO DO
SAV-139	As Project Team, I need to design accesses retrieval from any datasource in the framework	TO DO
SAV-48	As Project Team I want to have a common way to load different applis/files into BQ/Cloud storage when talend is not used	TO DO

Sprint 1

17/03/2020 31/03/2020

Key	Summary	Status
SAV-141	As Team I want to retrieve technical users (and not filter them)	TO DO
SAV-140	As Team I want to retrieve Gudsis automatically so as to support industrialization	TO DO
SAV-139	As Project Team, I need to design accesses retrieval from any datasource in the framework	TO DO
SAV-137	As AppSheet domain Leader I want to save AppSheet logs on a monthly basis so as to anticipate license needs/monitor usages	DONE
SAV-136	As Team I want to study Gudsis in more details so that the reporting is correct	TO DO
SAV-48	As Project Team I want to have a common way to load different applis/files into BQ/Cloud storage when talend is not used	TO DO
