

BP Software Architecture

This document provide the detail description of each layer of the applications implemented. It focus on the framework, design rationale, user access control list, application configuration, environment and features.

The listing below are the layers used for this project.

Main Environments

GCP Project

Environment	URL to Google Cloud Console
Dev	https://console.cloud.google.com/home/dashboard?project=rni-datalake-batteries-dev
Preprod	https://console.cloud.google.com/home/dashboard?project=solvay-rni-datalake-bat-ppd
Prod	https://console.cloud.google.com/home/dashboard?project=solvay-rni-datalake-bat-prod

Talend Projects

Projets	Talend Project Name	Git
ELN EWHA and Bollate	RnI_Battery_ELN on BENOHAS06	
Raw Data EWHA	RnI_Battery (runs on KRSEUAS02)	
Raw Data Bollate	RnI_Battery_Bollate on BENOHAS06
