- [Features Specification](#)
- [Database Diagram](#)
- [Issues List](#)

## Framework used

List of framework used for the application used in this scope:

1. Google Endpoints

## Design Rationale

State a list of rules with the rationale for the design when coding the solution.

Rules	Rationale
All binary assets (image file, videos, pdfs, non-code) must be stored in the "/src/assets/".	Simplify to locate the assets used by the application.

## User Access Control List

This table summarize the user role permission of the application, if there is any.

Features \ Roles	Anonymous	Frontend URL	Remarks
Standard Login API	YES	NO	Only accept calls from the Frontend URL
Reset Password API	YES	NO	Only accept calls from the Frontend URL
View Object API	NO	YES	Only accept calls from the Frontend URL
Create Object API	NO	YES	Only accept calls from the Frontend URL
Update Object API	NO	YES	Only accept calls from the Frontend URL
Delete Object API	NO	NO	Only accept calls from the Frontend URL

## Application Config

This is a listing of all the configuration that can be found for the application.

Description	Location	Remarks
Indicate the GCP location of project.	/src/environment.ts	
Indicate the components routing configuration.	/src/app/app-routing.module.ts	

## Features Specification

In this section, all the technical specification to support will be listed here.

**i List of features**

Unable to render {children}. Page not found: Project MuSigma - TLC: Backend Software Architecture - <template>.

## Database Diagram

In this section, provide the link or diagram to show the design of the database.

<<To be replaced with a diagram or hyperlink to the diagram>>

## Issues List

If there is a JIRA used for tracking the Issue, simply add in the URL to the project of the JIRA here. Otherwise, track the changes here.

Ticket #	Description	Link to supporting Documents	Status	On Production	Reporter	Issue Resolver
0001	Cannot Login with xxx@solvay.com		Processing	No	<a href="#">Maya Vanard</a>	<a href="#">ONG, Hoong Chiang</a>
