Modification of BW Assessment Report

Technical Name: BW_WB_EHS_0001.

Problem statement: Update the BW Assessment Report - Workbook Management (BW_WB_EHS_0001) . There is a new regulatory class available in SAP EHS following the 2310 Package implementation for SAP_EHS_1023_120 (Tolerable and Env. Exposure Limits (NZ)). Therefore this class Should be available for data extraction within the BW report.

Previous Scenario: There were restrictions on the fields Value Assessment Type Flag as "X".

Current Scenario: The Value Assessment Flag restrictions ahs been removed so that the Class with Blank Values in the Value Assessment Report Flag is also available in the dashboard.

As we can see the column "Value Assessment Type" is showing values SAP_EHS_1023_120 now which was not present before.
