

****obs** BO - CDB Broadcasts**

Such broadcasts are no more active

IMPORTANT:

1) Never run manually the **real** publications below without the request from D&R team (Nathalie Silva; Eliza Veipane)

	CDB_PUB_HC_FAM
	CDB_PUB_HC_FUN
	CDB_PUB_HC_GBU
	CDB_PUB_HC_ZONE

2) You can run the **test** publications below on the request from D&R team

	DASA_PUB_HC_FAM
	DASA_PUB_HC_FUN
	DASA_PUB_HC_GBU
	DASA_PUB_HC_ZONE

3) To test the data, please refresh always the BI4 reports

We fix the data on each 7th, no matter 7th is weekend or not.

Loading Frequency:

The source data in CSV is generated from the process chain( **16 - IC01 Broadcast**) of PQ2, and they're loaded into CDB two times per day (10am and 3pm CET).

 AP_ZPA_C01_Q0028.CSV

 AP_ZPA_C01_Q0029.CSV

If one of the two files contains empty records, then please create a FD ticket to IS-CGI-L3-HtR-Reporting with the high priority, asking them to rerun the process chain; and then reload them to CDB.

Calendar:

The CDB broadcasts are sent based on the two custom calendars below.

1) CDB-Calendar-Comex

11th of each month if it's not weekend, otherwise the next working day

2) CDB-Calendar-DASA

7th of each month if it's not weekend, otherwise the next working day
