- [Dump when displaying/creating info-package](#)

Dump when displaying/creating info-package

Problem : hen displaying or creating an infopackage I get a dump message "Message (type X)". Example below :

Runtime Errors	MESSAGE_TYPE_X
Date and Time	19.07.2012 14:58:09

Short text
The current application triggered a termination with a short dump.

What happened?
The current application program detected a situation which really should not occur. Therefore, a termination with a short dump was triggered on purpose by the key word MESSAGE (type X).

Solution : ou have to delete all the entries in tables RSSDLINIT and RSSDLINITSEL for this infosource.

Table RSSDLINIT Display	
InfoSource	2LIS_02_SCL
Logical system	WV1_400
Request number (RNR)	REQU_4PTUTNLZVHRP0JHMKWT1F69F1
Code à 1 caractère (INITSTATE)	X
Code à 1 caractère (DELTAINIT)	
Domaine défini imprécisément, evtl. utilisable p. niv. patch	OOO
Horodatage UTC en abrégé (AAAAMMJJhhmmss)	20.120.514.094.846
Current Date (SELDATE)	14.05.2012
User Name	SHCHUA
Current Date (LAST DELTA)	19.07.2012
Request number (LAST DELTA RNR)	REQU_4QJRBYSKMQ1YULXKCC8XAN831
Zone de 10 caractères	1

We can do it ourselves with this program: RSSM_RSSDLINIT_RESET_CRASH

Program Edit Goto System Help

Reset Tables *RSSDLINIT* and *RSSDLINITSEL* After CRASH
