

The Developer capabilities

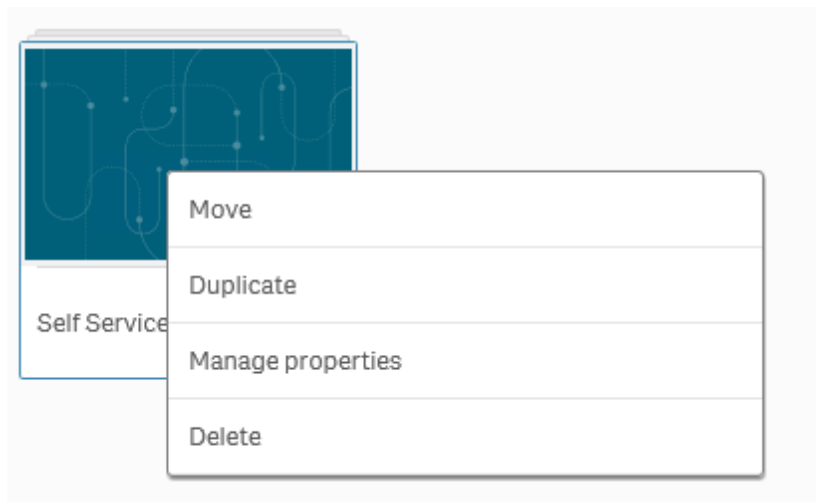

The Developer profile grants you some privileges on your QlikSense applications.

Duplicating app

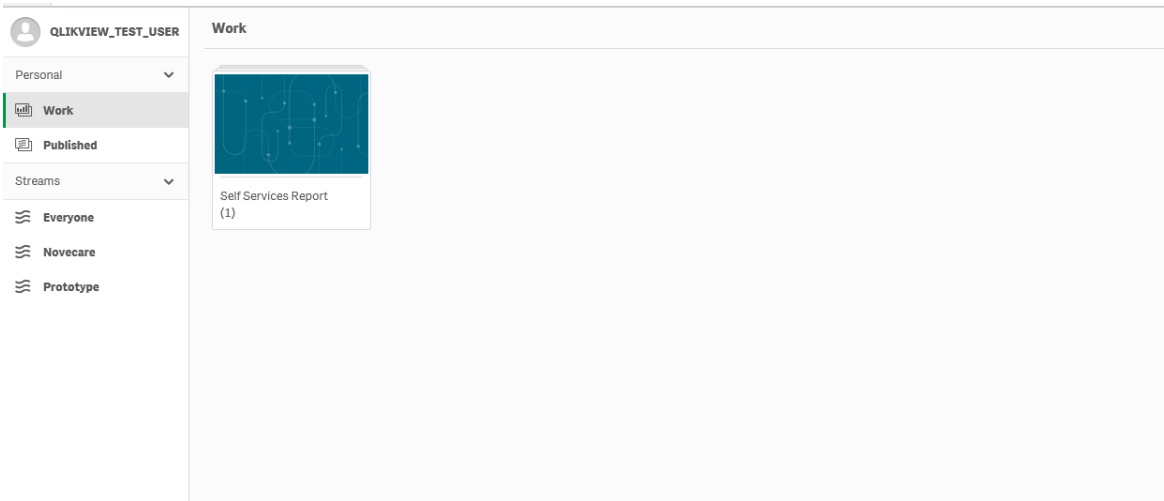

When your app is published you will be able to see it in the corresponding stream.

If you are owner of the app (If you publish it), you can duplicate it by right click.

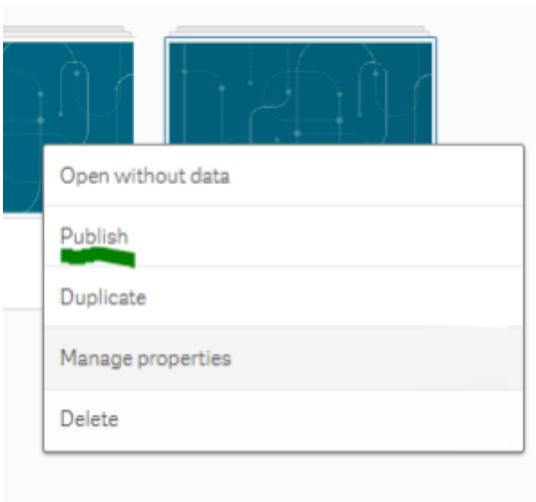

When the app is duplicated, a copy of the published app appears in the My work stream.

By this way you can modify it without modify the published app.

Publishing and replace your app

When you're ready to publish a new version of the app, you can do it by right clicking on the duplicate app in My work.

Note : If you publish for the first time please go to this section : [Publish your app at the first time](#)

If the app is a duplicate of the published app, you will be able to publish and replace the existing app.

Publish app

Stream name
Choose the stream you wish to publish your app to

Prototype

App name
Give the app a name

Self Services Report

Replace the existing app

App properties
Adding custom properties to the app makes it available in other deployments, and enables control of app access.

Manage

Cancel Republish

Warning : If you duplicate a duplicated app, you won't be able to publish and replace the existing app.
