General presentation

Objective of the application

To get the value stream and the ERP Activity 2 data

Tool Leader + IT leader of the application: Guillaume Thevenet

Usage information

Master data

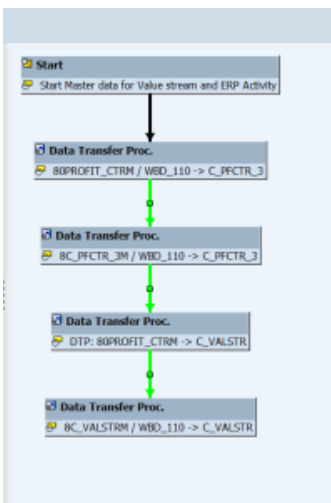

History

Originally, these loads are part of Process chain RSP_VS_MD. In WBP, the update rules(3.x) of these objects were upgraded to 7.x transformations, but still the 3.x flow was maintained in process chain and was failing.

So, the transformations along with new DTP's were moved to WBP and a new process chain is created for time being for these two objects.

Dataflow overview

Process Chain: PC_FI_MD_01

Functional and Technical rules on Workbench + Reporting

Rules & Explanations

NA

Dependencies with other applications

NA

Data loadings

Info providers and objects loaded

Infoproviders: C_PFACTR_3 and C_VALSTR

Process chain: PC_FL_MD_01

Loading frequency

Daily

Average performance

Record Keeping

Maintenance

Known bugs

Recurring procedure

Planned Evolution

Workflow history

This view shows the 5 most recent entries. The complete workflow log is available from the 'Document Activity' menu item.
