

Publish your app at the first time

When you have finished your dashboard, you will surely want to share it with other Solvay colleagues.

Publishing your app

The first step for you is to publish your app.

By right click on your app in the My work stream you will be able to publish it.

Publish app

Stream name
Choose the stream you wish to publish your app to

Prototype

App name
Give the app a name

Self_Services_Report

App properties
Adding custom properties to the app makes it available in other deployments, and enables control of app access. Manage

Cancel Publish

Select the stream (Category) in which you want to publish your app.

Note: If no stream are corresponding to your dashboard that means you don't have access for the moment or the stream does'nt exists. In this case click on *Cancel* and go directly in the section below : [Submit the Google Form](#),

Give the app a name.

Click on publish.

Submit the Google Form

In order to add new users you need to submit this [Qualtrics](#) form :

Note : you can give two rights to Users : [Viewer rights](#) and [User rights](#).

Qualtrics will open automatically a Freshdesk ticket to resolve your request

Now you can move on to the next part : [The Developer capabilities](#)
