

# BW - Smartfloat interface !! obsolete !!

The new wiki link for this data flow is here:

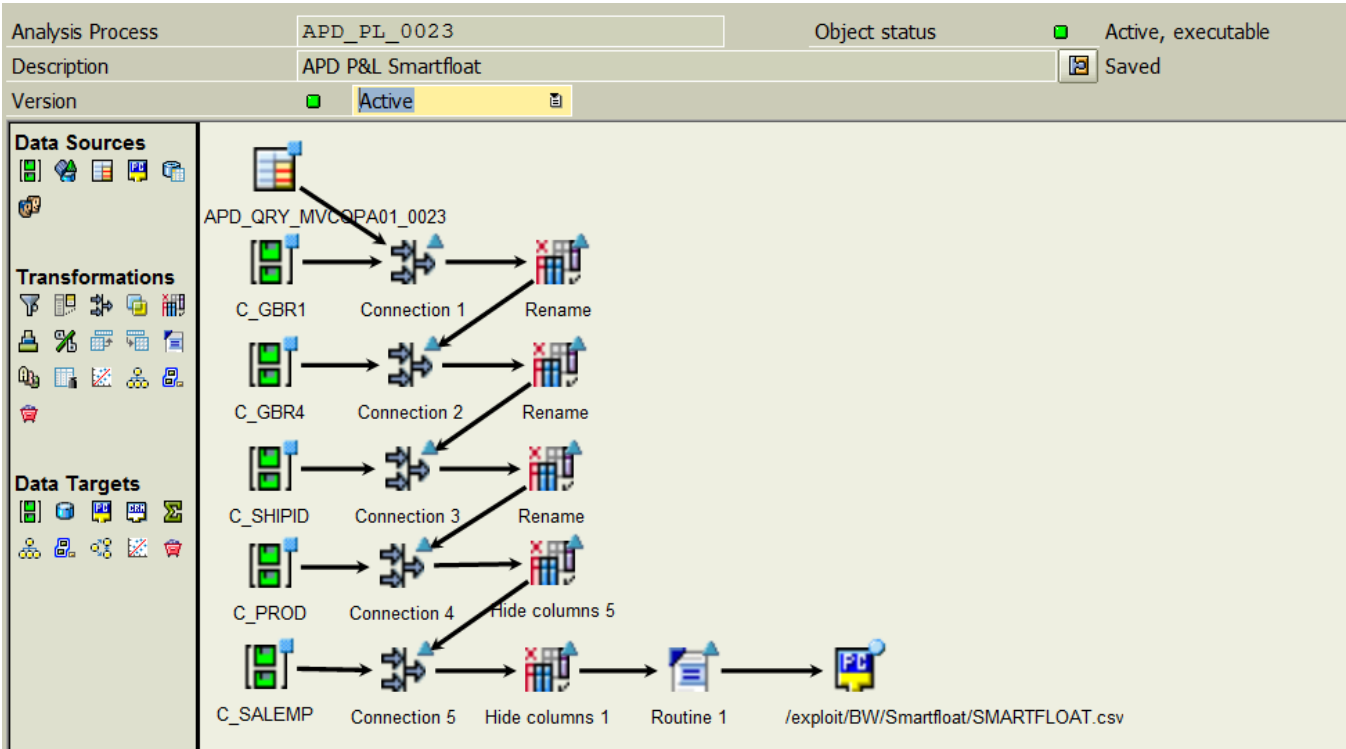

[BW - Smartfloat interface](#)

Please update the doc there and no longer here.

Project: SAG was "Select A Guide"  
Point of Contact: Juan.Mantilla@solway.com or tiago.ramalho-ext@solway.com  
(before james.kyndt@solway.com)

Dev BW :  
Query used : QVSBS\_BW\_QRY\_MVCOPA01\_0004 (core query : BW\_QRY\_MVCOPA01\_0004)  
Folder used : /exploit/bw/Smartfloat  
APD :APD\_PL\_0023

Routine :

```

DATA: ls_source TYPE y_source_fields,
      ls_target TYPE y_target_fields.

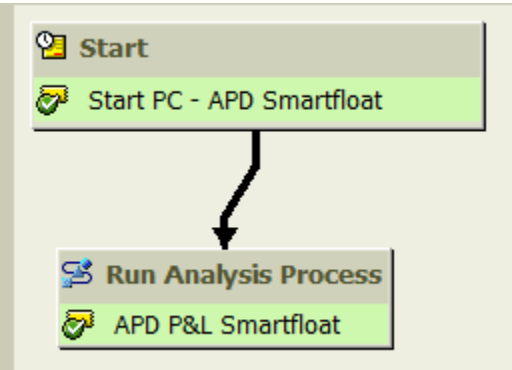

*ls_target-CALYEAR = 'Year'.
*ls_target-APPLICATION = 'Application'.
*ls_target-END_USE = 'End-Use'.
*ls_target-SHIP_TO = 'Ship-to'.
*ls_target-PRODUCT = 'Product'.
*ls_target-PRODUCT_CODE = 'Product Code'.
*ls_target-SALES_REP = 'Sales Rep'.
*ls_target-REVENUE_USD = 'Revenue (k USD)'.
* APPEND ls_target TO et_target.

LOOP AT it_source INTO ls_source.
  MOVE-CORRESPONDING ls_source TO ls_target.
  CONDENSE ls_target-REVENUE_USD.
  APPEND ls_target TO et_target.
ENDLOOP.

```

Process chain :

PC\_PL\_APD0001

Frequently : Every Monday (weekly method) at 10:00 (before Every Saturday (weekly method) at 10:00, change done 6th September 2021)

Flat file generated : product\_sales\_records\_.csv

Using logical file name : Z\_BW\_SMARTFLOAT\_EXTRACT

Path on BW server : /exploit/BW/Smartfloat/<FILENAME>

Logical path : Z\_BW\_SMARTFLOAT

|               |                                   |                 |
|---------------|-----------------------------------|-----------------|
| Logical path  | Z_BW_SMARTFLOAT                   |                 |
| Name          | Smartfloat - path for file export |                 |
| Syntax group  | UNIX                              | Unix compatible |
| Physical path | /exploit/BW/Smartfloat/<FILENAME> |                 |

+ Webmethods to move from BW server to Google cloud plateform (need to check webmethod team for this part)
