 Load file

Download

Target Filename

C:\Temp\

 Download

How to use the program:

1. Access the program via transaction code **ZBW_SD_GBU_ZONE**
2. Inform GBU
3. Select the file on your PC, which has to be excel and with correct format (template below).
4. Click on **Preview** in order to check the authorization for the GBU and data correction. It may take some time.
5. Click on **Check File** to get the summary of the data correction.
 - a. If data is incorrect, it will tell how many error and what line is incorrect on the file. Correct the file and try step 2 again.
 - b. If data is OK, the Load File button will be available
6. Click on **Load File**, it will save the data into BW server and run process chain PC_GL_SALES_GBU_ZONE in order to load C_GBUZONE master data.
7. If you want to download the current content of this object in BW for reference, just inform a Target Filename and click on **Download**.

File template

	A	B	C	D
1	GBU	Country	Hier 1	Hier 2
2	SD	BR	SEA	LAT
3	SD	FR	EU	WE
4	SD	US	NAF	NAF

Roles & Access

Roles and access

List of application role + menu role and explanation if we have several applications role with specials rules.

Role Code	Role Description	Explanation
		In order to access the t-code ZBW_SD_GBU_ZONE
ZR_*_CA_P05	GBU	Check authorization for the GBU

Authorization objects

List of autorisation objects mandatory for the application.

Authorization object	Explanation
Z*P05	GBU

Dataflow overview

Reporting documentation drive folder:

<https://drive.google.com/drive/folders/0B0qn89R0RGdqYkZZOFZyYXlXVke>

Exemple of dataflow overview :

Template Application name DataFlow

Functional and Technical rules on Workbench + Reporting

Rules & Explanations

- 1. Authorization for the GBU will be checked against the user roles on BW system.
- 2. The data will be replaced based on the key GBU + country. If the same key exists in the same file, it will be replaced by the last record.
- 3. If a user is loading data and it is not completed yet, another user will not be allowed to do it. He will receive a message to wait until the process chain is finished.

Dependencies with other applications

Data loadings

Info providers and objects loaded

- PC_GL_SALES_GBU_ZONE - load C_GBUZONE master data.

Loading frequency

The load is triggered by the user via transaction **ZBW_SD_GBU_ZONE**.

Average performance

Key Figure	Estimation
~ Average Process Chain Runtime	
~ Average nb of rows loaded per load	
~ Total nb of rows loaded (if full)	
~ Average Runtime for 10k lines
