## MFT

One MFT task that checks Dynasys folder **every 10 min** from **6.30 pm CET** to **midnight**.

If the file SAFIRZD30.csv exists, then :

1/ MFT catch this file and sends it to BI4

2/ MFT moves this file in the Dynasys archive folder (mandatory action, otherwise MFT will send the same file every 10 min) and renames it by adding a timestamp

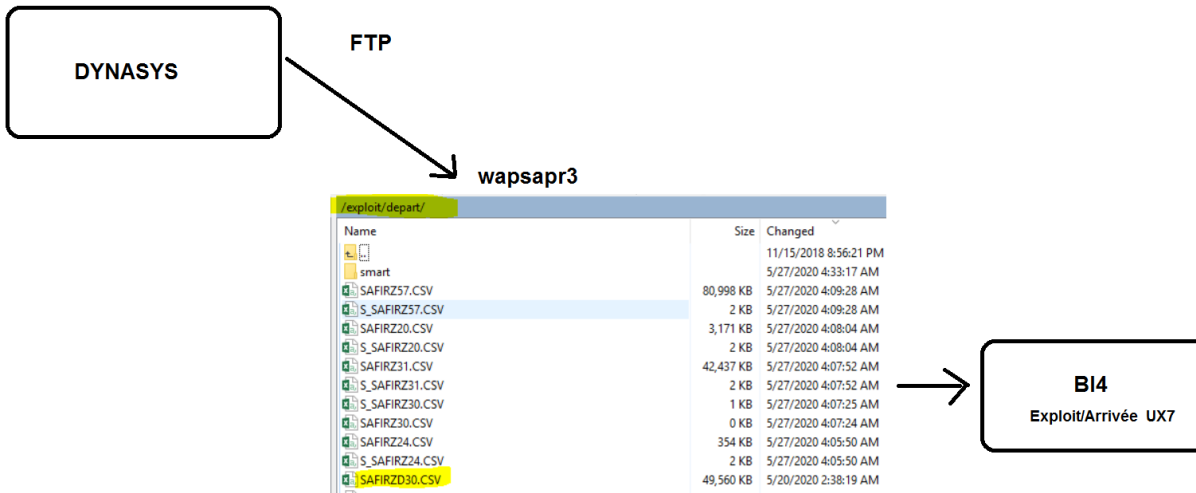

Type	Name	DNS	IP address
DEV	WDCWMAD02	<a href="http://WDCWMAD02.eua.solvay.com">WDCWMAD02.eua.solvay.com</a>	150.251.113.105
PRE-PROD	WDCWMAV11	<a href="http://WDCWMAV11.eua.solvay.com">WDCWMAV11.eua.solvay.com</a>	150.251.113.119
PRE-PROD	WDCWMAV12	<a href="http://WDCWMAV12.eua.solvay.com">WDCWMAV12.eua.solvay.com</a>	150.251.113.120
PROD	WDCWMAV11	<a href="http://WDCWMAV11.eua.solvay.com">WDCWMAV11.eua.solvay.com</a>	150.251.113.131
PROD	WDCWMAV12	<a href="http://WDCWMAV12.eua.solvay.com">WDCWMAV12.eua.solvay.com</a>	150.251.113.132

One archive folder exists on Dynasys servers :

Environment	Server	Directory
DEV	WDCDYAD21	<a href="http://wdcdyad21.eua.solvay.com">\\wdcdyad21.eua.solvay.com</a> \DynaSys\DEV\ITF\Files\Out\Archives
TEST	WDCDYAD21	<a href="http://wdcdyad21.eua.solvay.com">\\wdcdyad21.eua.solvay.com</a> \DynaSys\TEST\ITF\Files\Out\Archives
PROD	WDCDYAP21	<a href="http://wdcdyap21.eua.solvay.com">\\wdcdyap21.eua.solvay.com</a> \DynaSys\ITF\Files\Out\Archives

## FTP

Dynasys file loading moved from FTP to MFT

Re: Removal of **FTP** TR\_TRANS\_FTP\_PECO\_SAFIRAPO

À Cyril, moi, Ravichandra

Hello Cyril,

The request to delete the automator job '**TR\_TRANS\_FTP\_PECO\_SAFIRAPO**' from SAFIR automator graph has been submitted to IBM as service request SR22238383

The screenshot shows the 'Service Request Details' page for request SR22238383. The status is 'CLOSED'. The request title is 'Removal of TR\_TRANS\_FTP\_PECO\_SAFIRAPO from TR\_TRANS\_FTP\_PECO\_SAFIRAPO'. The description mentions the deletion of an automator job from the SAFIR automator graph. The request was submitted by Alvaro Monteiro on 5/27/2020 at 16:14:55. The target system is identified as 'SAP'.

I'll keep you posted

Thanks,

## Contacts on Dynasys side

### Developer :

Laura Labbadi

etienne.ribet@solvay.com

## File received

Frequency of export of file SAFIRZD30.CSV from DynaSys : generate the file two times per day:

- 23h00 CET
- 18h15 CET (so that Asian could see the data D+1 in their morning)

Contain Forecasts from the current month.

## Loader and SQL

 gl\_forecast\_dyn.ctl

 gl\_forecast\_apo.plsql

Remark :

The loader loads the **SOLD\_TO\_CUSTOMER on 11 digits** in the **TMP\_GL\_FORECAST\_APO** because of an hidden character at the end of the Dynasys file.

With the SQL from TMP to REC and PROD, we get the substring of 10 first digits of the Sold-To code. So in REC and PROD, the customer code is well **back on 10 digits**.
