Technical Name	Description	InfoProviders	Contact	Comments
BW_QRY_MV_SPD01_0008	SPRINT - PUR: Data Detailed Analysis (Core Query)	Cubes FIAP for Sprint	Sylvie SEVERINI	The query is limited to a list of defined document type See C_GLBFLT / FIAP / DOC_TYP_4 The list is catched via the box variable V_C_DOCTYP_0004. The variable is not "Ready for Input" because via analysis the limit of number of lines in the selection screen is reached (due to lots of Document Types to filter in the query). To get the exhaustive list of Document type to consider for the query, a test request ZTES T2_BW_QRY_MV_SPD01_0008 has been created in production, which allow to select the wanted Document type in selection screen.  When the exhaustive list will be done, missing document type will be added in the global filter, and the test query could be then deleted
