

# Cost Center Master Data

This application was decommissioned & replaced by FC - GBU fixed costs. In the [GBU fixed costs](#) application we can find the workbook for the Cost Center Master Data report where the user can check this information for all GBU's.

If you are a user with access to CBS function costs application and you need to see the cost center master data report, you will need to request access to the GBU fixed costs application via Service One.
