

TK'Blue - Activate the SSO

Activation of the SSO is mandatory and part of the cybersecurity best practices.

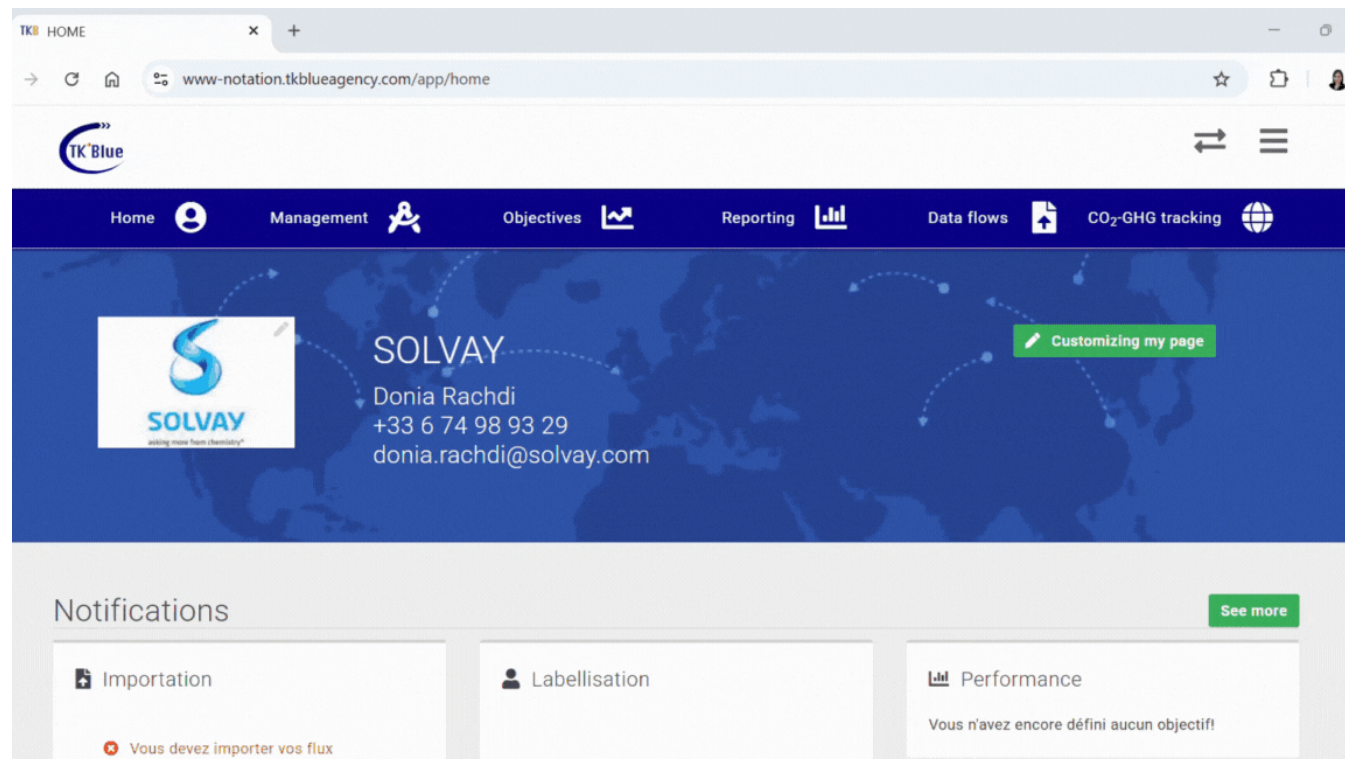

For end-users, it is also an easy way to log in the tool without using a password.

Once your account is created, you receive an email from TKBLUEAGENCY with your credentials and the URL: <https://www-notation.tkblueagency.com/>

For the 1st login, use the password that has been automatically generated for you (tip: copy it, you will have to paste it twice). Next time, just click "sign in using Microsoft", no need to enter your email.

Then, go to the security set up and activate the SSO

See how to proceed below

The screenshot shows the TK'Blue application interface. At the top, there is a navigation bar with the TK'Blue logo and a menu icon. Below this is a dark blue navigation bar with the following items: Home, Management, Objectives, Reporting, Data flows, and CO₂-GHG tracking. The main content area features a large blue banner with a world map background. On the left of the banner is the SOLVAY logo. To the right of the logo, the user's name "Donia Rachdi" is displayed, along with their phone number "+33 6 74 98 93 29" and email address "donia.rachdi@solvay.com". A green button labeled "Customizing my page" is located in the top right corner of the banner. Below the banner is a "Notifications" section with a "See more" button. There are three notification cards: "Importation" with a red icon and the text "Vous devez importer vos flux"; "Labellisation" with a person icon; and "Performance" with a bar chart icon and the text "Vous n'avez encore défini aucun objectif!".
