

# Transfer pricing elements

[Business Term Status](#) | [Data Business Definition](#) | [Roles](#) | [Data Sources, Type and Classification](#) | [Working Instruction](#)

## Business Term Status

---

The Business Term is currently **validated** by the Data Governance Committee.

## Data Business Definition

---

The **transfer pricing elements** are used to define the transactions and the respective transfer pricing calculation and methodology. These are maintained in the Transaction Surcharge Reduction Assignment Table (TSRA) which, through a routine calculation, determines the technical method applied as well as the surcharge/reduction percentage. Other basic transfer pricing elements are considered in this calculation such as the average historical unit sales price and material production cost (material master data).
