

Technical Documentation - Appraisal(Obsolete)

We stop to load the data from YOU.

Data Model:

On DTPs to Load ABHRPECO, a routine is used to calculate the Campaign Year and bring out the end date of a campaign date:

TVARV: ZHR_CAMPAIGN – To maintain the current Campaign Is Maintained Manually

Master Data for Loading and Reporting: C_CAMPAIG – Contain the Campaigns to be loaded by start and end date is maintained manually
