2.0 Business Process

The workplace is changing, and so is Solvay's approach to development:

- Individuals are expected to **own and drive their development**, supported by their Manager as a coach.
- **Development is more than traditional classroom training**. It is an ecosystem built around performance culture, talent attraction, talent management, *and* learning.
- **There is no substitute for experience**. The research is clear about how we grow most successfully: 70% experience, challenges and assignments, 20% exposure to developmental relationships, and 10% formal education, also known as the 70-20-10 model. See below for more information.
- **Learn, unlearn, relearn**. We are shifting from "single-event training" to a culture of continuous development.
- **Self-directed, digital learning options** offer an efficient, accessible way to scale up the impact of learning, aligned with Solvay's sustainability goals.
- **We bond with our purpose when we bond with each other**. Many of Solvay's development options help individuals grow their networks, learn from peers, and encourage self awareness through a culture of feedback.

70 / 20 / 10 LEARNING MODEL IN ACTION

The research is clear about how we grow most successfully: 70% experience, challenges and assignments (on-the-job), 20% exposure to developmental relationships (other people), and 10% formal learning (coursework and training), also known as the 70-20-10 model. We can look at this model as “*think, talk, and do.*”

The following are practical examples of each dimension, regardless of your role within the organization.

START HERE: Development discussion with your manager	10 : Think Formal Learning	20 : Talk Social Learning	70 : Do On-the-Job Learning
	- Leadership Academy - Functional Skills Training - Books and articles - Presentations - Podcasts, TED Talks - Webinars	- Coaching at Solvay - Feedback from Manager or colleagues - Subject matter networks - Communities - Mentoring (both as a mentor and a mentee) - Formal and informal coaching	- Applying what you've learned in a group setting. - Putting new techniques or approaches into practice with your team. - Stretch assignments inside or outside your current role. - Problem-solving and innovation in challenging tasks.
	Learning Event	Learning Momentum	Integration of Learning

Example: Spend 10 minutes listening to a [TEDTalk about “powerful speaking.”](#) Take 20-30 minutes trying it out and asking a colleague for feedback on how you did. Then, apply what you’ve learned in your next hour-long team meeting. Reflect on what reactions you encounter, how you could improve the next time.
