Dependencies with other applications

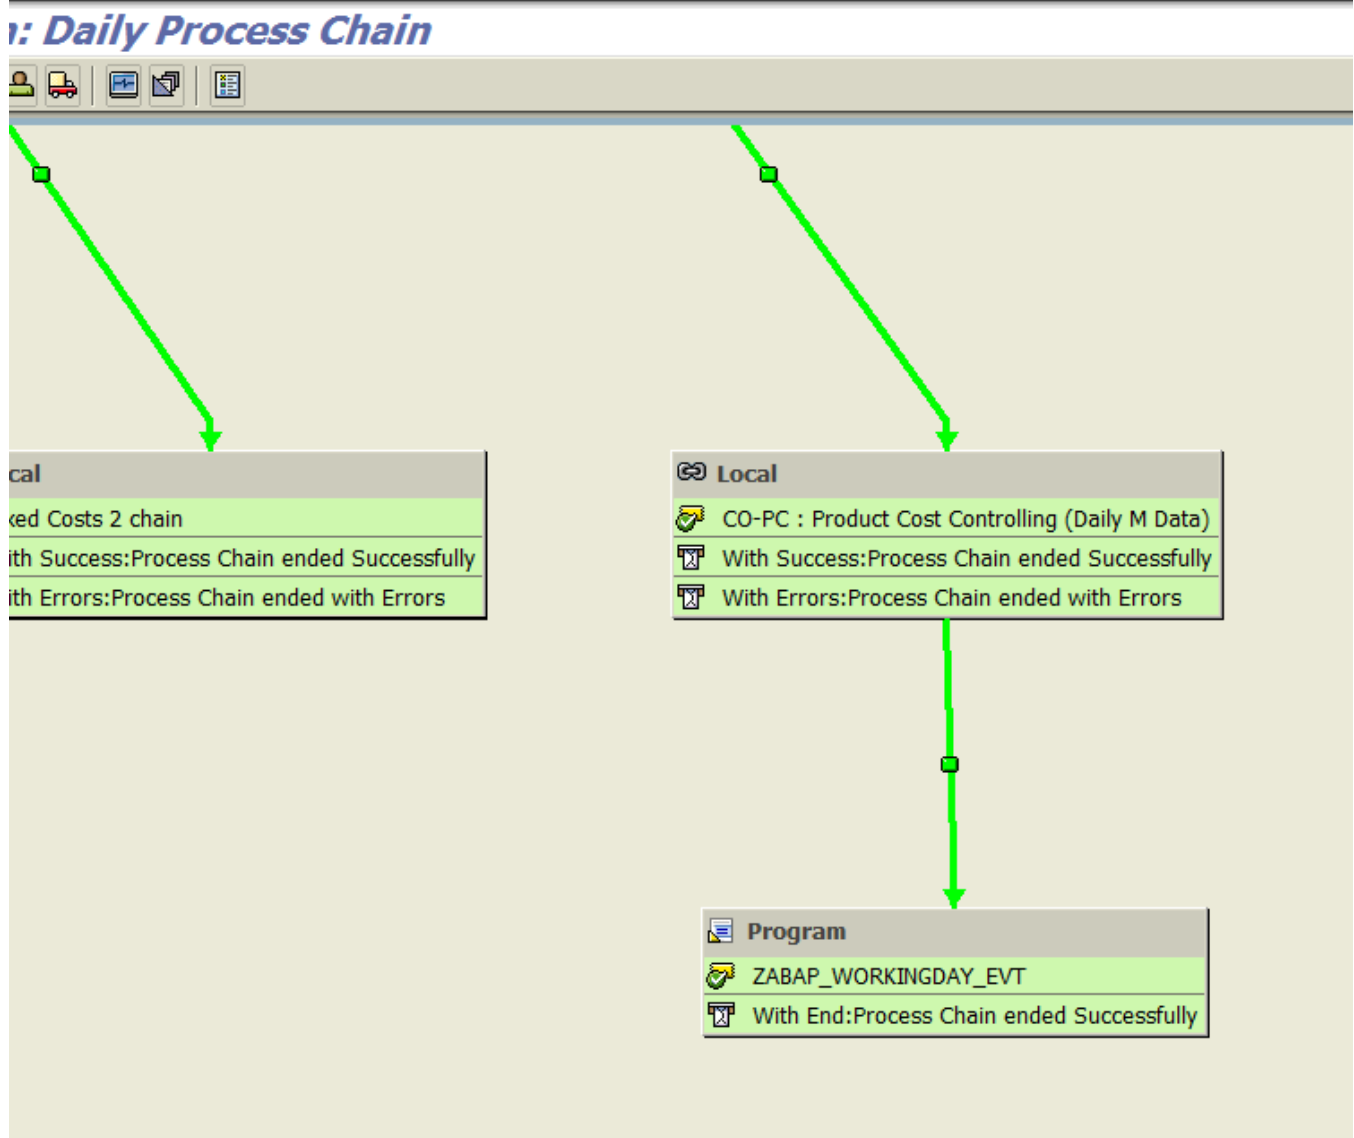

We should have the information where the application is sending or receiving information (e.g. APD open hub)

Data Loading

About the monthly process chain : RSP_COPC_MONTHLY

The process chain is scheduled with an event : Z EVT_PC_RSP_COPC_MONTHLY

This event is launched by the daily process chain : RSP_DAILY

The variant ABAP_WORKING_DAY is done with the program Z_WORKINGDAY_EVT + Variant ZPP_PC_CCR

Data Browser: Table RSPCVARIANT: 8 of 8 Hits

Link with CPX system:

In scope of 8612 - Solstice Aro project, a link with CPX system was done to calcul and use vault informations in integrated margin.

Data Quality Control

Data come from SAP system. To compare data between BW and sources systems, check propagation layers.

Operational Documentation

Procedures

<Describe the recurring procedures needed to operate the application (eg. start/pause/terminate/restart the app processes, data preparation, data ingestion, ETL, data visualization, data export, other manual activities)>

Scheduling

<Describe the scheduling in place for the application (eg. existing jobs, trigger time/event based, dependencies)>

Monitoring

<Describe the monitoring checks to confirm the application is performing well (eg. check the overall status, check performance metrics like runtime /data volume/memory/disk/CPU, maintain and react to alerts/notifications)>

Error Handling

<Describe how to handle errors (eg. error codes, description and respective resolution, alert users)>

Known Bugs

<List the existing bugs, its criticity, workarounds and resolution plan.>

Roadmap

<List past & future evolutions for the application (including links to MED/FSD/TSD)>
