

Add a new application in LeanIX, Service ONE and "DA&AI - Applications running in Production.gsheets"

1. While discussing new initiatives in the Architecture Assurance Board, the **Enterprise Architecture team** will add the new app in [LeanIX \(+ details\)](#)
2. The **Data Product Owner** will:
 - a. Define the app name according to the naming convention:

<functional domain> - <app name> <report or dashboard, if applicable> - <SLV or SQ0, if applicable>

 - a. Request the **Enterprise Architecture team** to update (or add) the app in LeanIX
 - b. Add the new app to the [DA&AI - Applications running in Production.gsheets](#) (this gsheets is expected to be decommissioned and start relying on LeanIX only)
 - c. Request the **Operations team** to add the new app in Service ONE CMDB (via [DA&AI Service Request](#), choosing the option "Any other type of support")

Functional Domain - Data Product Owner

Finance - TBD
HR - Ana Rocha
Industrial - Sébastien Goeuriot
Marketing & Sales - Donia Rachdi
Procurement - Ana Rita Messias
R&I - Sébastien Goeuriot
Supply Chain - Donia Rachdi
Sustainability - Ana Rocha
