Access Management

Roles & Access

This Colmar application will use composite roles, which contain many roles inside below

Composite Role	Role Name	M44	M441	A10	A11	A12	A13	A14	A15	A16	A17	A18	A19	A20	M09	ZBI_RCS_CO_A21
ZC_RCS_COL_C01	COLMAR - Administrator		X	X	X	X		X		X			X	X		
ZC_RCS_COL_C02	COLMAR - IT Admin	X		X	X		X		X	X	X		X	X		
ZC_RCS_COL_C03	COLMAR - GBU Coordinator			X	X	X		X		X		X		X	X	X
ZC_RCS_COL_C04	COLMAR - Reporting Plant			X	X	X		X		X				X	X	X
ZC_RCS_COL_C06	COLMAR - Forecaster	X		X	X	X		X		X				X	X	X
ZC_RCS_COL_C06_PAX	COLMAR - Forecaster - For PAX	X		X	X	X		X		X				X	X	X

Authorization Objects

Authorization variables on queries are based on info objects: C_BFCA_4, C_MA_PR__C_BFCA_4, C_PLANT, C_COMPCDE and C_FAMINPR.

C_AUTHMA variables are customer exit variables.

For Colmar application, authorization objects will be in application roles.

History: 2023: To segregate data of Po2, authorization scope (C_AUTHMA) has to be added into project bundle (C_MA_PR). It is required to modify web portal, authorization application role, C_MA_PR object and BW query

Role	Role Name	Auth Obj	Family (C_MA_PR__C_FAMINPR)	GBU (C_BFCA_2__C_BFCA_4)	C_COM PCDE	Plant	Provider	C_AUTHMA (For Po2)

The application role will use class (user exit) to get the perimeter value of authorization objects, which get value from DSO DPIPICO15. This DSO is updated in Colmar Portal by Francois.

The application role will use class (user exit) to get the perimeter value of authorization objects, which get value from DSO DPIPICO15. This DSO is updated in Colmar Portal by Francois.

Variable detail gets from SM30 - ZBIU001_V_VAR
Display class = SE24 - ZCL_BIU001_COLMAR_AUTH.

A New Variable V_C_AUTHMA_39 to extract the User specific authorisations ECO/SCO from the DSO DPIPICO15. This variable is visible for User to modify and input values on authorisation

scope (ECO/SCO). This will help users to restrict the data in queries BW_QRY_MVIPICO02_0001 and BW_COLMAR_MVIPICO17_0001.

Investment Project

COLMAR > Investment Project > GBU Coordinator > Colmar - User access management

Function: Project Manager

Colmar rights

Append Row	Delete Row	Duplicate line(s)	Plant	Plant Zone	Intermediate Approver	Intermediate Amount	Family Inv. project	Perform/Invest type	Final Approver	Final Amount	Display	Flag Active (Y/N)
			NOVECAR	0214 - 6068 Oldbury	All	No	0 All	ALL	No	0 Read Only	Activate	

BW rights

Append Row	Delete Row	BW Colmar role	Assignment status
		COLMAR - GBU Coordinator	
		COLMAR - Forecaster	

Data Browser: Table /BIC/ADPIPICO1500 Select Entries 1

Table: /BIC/ADPIPICO1500

/BIC/C_COLUSER	/BIC/C_BFCA_4	/BIC/C_ZONE	LOGSYS	/BIC/C_PLANT	/BIC/C_FAMINPR	/BIC/C_PERF_IT	/BIC/C_VAL_DOM	/BIC/C_APPLVL	RECORDMODE	/BIC/C_DISPLAY	/BIC/C_FLAGACT	/BIC/C_AUTAEUR
TH30085	CS	WP1_400	0214	ALL			NONE		DISPLAY	Y	0.00	

However, the normal perimeter roles such as Plant if it is assigned to a Colmar user as well, it will combine the access with the DSO DPIPCO15

For example, user KLMLUNG has authorization only for Novecare GBU and 2 plants 0263 and 0269 in the DPIPCO15 but he also have role ZR_RCS_CA_P02 to access all plants

DataFlow

Overview

The differents providers are loaded with webdynpros:

Objective of the application

COLMAR = **C** apex **O** verall **L** ifecycle **M** anagement **A** pprovals and **R** eporting

COLMAR is a tool to follow and forecast industrial projects for all GBU.

Tool Leader + IT leader of the application: francois.carette@solvay.com

Main functionalities

Documentation here

https://drive.google.com/drive/folders/1SvrJBD9ZKyKZm9rKjmiNM0Q_4ld44f6G

BW_COLMAR_MVIPCO17_0005	BW COLMAR - Forecast Data (Core Query) with validation filte
F_MVIPCO19_001	COLMAR Forecast Data Entry
BW_QRY_MVIPCO19_0001	Forecasts - Summary data

It is in menu role ZR_RCS_CA_M44:

Broadcast

There are some broadcasting as well but it is out of scope of BW support. The broadcasting is manage directly by Francois.

Dependencies with other applications

We should have the information where the application is sending or receiving information (e.g. APD open hub)

Data Loading

Data Quality Control

Operational Documentation

Procedures

<Describe the recurring procedures needed to operate the application (eg. start/pause/terminate/restart the app processes, data preparation, data ingestion, ETL, data visualization, data export, other manual activities)>

Scheduling

<Describe the scheduling in place for the application (eg. existing jobs, trigger time/event based, dependencies)>

Monitoring

<Describe the monitoring checks to confirm the application is performing well (eg. check the overall status, check performance metrics like runtime /data volume/memory/disk/CPU, maintain and react to alerts/notifications)>

Error Handling

<Describe how to handle errors (eg. error codes, description and respective resolution, alert users)>

Known Bugs

- Colmar Folder missing in Portal WBP (BPJ)

the errors we found on [BPJ portal server](#) , were indicating problem in the backend system (WBP). Sometimes when there are temporary bottlenecks/freezes on the backend, the connection from the portal gets lost, and it's necessary to restart the portal.

==> **contact** : Benelux MIM Support <bmimsupp@in.ibm.com> , CSC Belgium <CSCBE@be.ibm.com> ,

==> **solution** : restart BPJ

Roadmap

<List past & future evolutions for the application (including links to MED/FSD/TSD)>
