## Access Management

### Roles & Access

This application is separated from Working Capital application (required to be in a separate role menu)

| Role Code      | Role Description                                    | Explanation                                                                                                                                                                                                                                                               |

## DataFlow

## Overview

Use the google presentation below as a template. This google presentation must be saved in the Reporting GDrive folder under the corresponding application. Then post the link to the document here.

Reporting documentation drive folder:

<https://drive.google.com/drive/folders/0B0qn89R0RGdqYkZZOFZyYXlXVke>

Exemple of dataflow overview :

Template Application name DataFlow

## General presentation

### Objective of the application

The aim of this application is to provide inventories valued with Integrated Margin cost unit (IMc)

The application owner is Rosario Sevilla  
The reporting coordinator is Charlotte Rollier.

### Usage information

### History

This application was created in 2018, requested by Technology Solution.

## Technical Rules on Workbench

### IM from FIGL at Integrated Costs (WBP):

cf. [IM from FIGL at Integrated Costs \(WBP\)](#)

### Logistic Inventory at Integrated Cost:

cf. [Logistic Inventory at Integrated Cost](#)

## Reporting

### Queries

| Query                | Description                                                  |
|----------------------|--------------------------------------------------------------|
| BW_QRY_MVFIWC04_0001 | Inventory report at integrated costs (Core Query)            |
| BW_QRY_MVFIWC04_0002 | Inventory report at integrated costs Monthly FX (Core Query) |
| BW_QRY_MVFIWC05_0001 | Inventory Aging Report at Integrated Cost (Core Query)       |

### Workbooks:

|                  |            |
|------------------|------------|
| ZR_RCS_CA_M64    |            |
| ZR_RCS_CA_M64    | 0000000715 |
| BW_WBK_IMWC_0003 |            |
| ZR_RCS_CA_M64    | 0000000714 |
| BW_WBK_IMWC_0001 |            |
| BW_WBK_IMWC_0002 |            |

## Dependencies with other applications

We should have the information where the application is sending or receiving information (e.g. APD open hub)

# Data Loading

## Info Providers and objects loaded

*Detail of process chain, list + link between or special event done for the loading*

|                                       | Main Process Chain                                                  | Final Provider Loading                 | Frequency                                                                                               | Time start           | Duration       |

# Data Quality Control

Data come from SAP system. To compare data between BW and sources systems, check propagation layers.

## Operational Documentation

### Procedures

<Describe the recurring procedures needed to operate the application (eg. start/pause/terminate/restart the app processes, data preparation, data ingestion, ETL, data visualization, data export, other manual activities)>

### Scheduling

<Describe the scheduling in place for the application (eg. existing jobs, trigger time/event based, dependencies)>

### Monitoring

<Describe the monitoring checks to confirm the application is performing well (eg. check the overall status, check performance metrics like runtime /data volume/memory/disk/CPU, maintain and react to alerts/notifications)>

### Error Handling

<Describe how to handle errors (eg. error codes, description and respective resolution, alert users)>

## Known Bugs

<List the existing bugs, its criticity, workarounds and resolution plan.>

## Roadmap

<List past & future evolutions for the application (including links to MED/FSD/TSD)>
