

GCP Documentation

This document provides an overview of the two main **Google Cloud Platform (GCP)** services leveraged in this project: **BigQuery** and **Dataplex**. These services work together to enable efficient data storage, processing, and quality monitoring.

- **BigQuery** is GCP's fully managed, serverless data warehouse designed for fast SQL-based analysis on large datasets. It is used to store, organize, and process data ingested from various source systems. BigQuery serves as the central data repository for this project.
- **Dataplex** is GCP's intelligent data fabric solution, which allows for unified data management, governance, and quality control across distributed data. In this project, Dataplex is responsible for the execution of data quality rules, ensuring the consistency and reliability of data processed and stored in BigQuery.

Project Hierarchy

The project structure within GCP has been organized to ensure clear separation between domains and environments, while supporting an efficient data ingestion and data quality validation process.

Domain-specific Projects

For each domain within the **Data Quality Monitoring Tool (DQMT)**, a dedicated GCP project exists for every environment:

- Development (*dev*)
- Testing (*test*)
- Pre-Production (*ppd*)
- Production (*prod*)

Each project serves as the location where:

- The data is ingested from source systems.
- The initial views used for data processing and quality checks are created.

Domain Projects List

Domain\Environment	Development	Testing	Pre-Production	Production
Human Resources	<i>prj-data-dm-hr-dev</i>	<i>prj-data-dm-hr-test</i>	<i>prj-data-dm-hr-ppd</i>	<i>prj-data-dm-hr-prod</i>
Structure & Shared	<i>prj-data-dm-structure-dev</i>	<i>prj-data-dm-structure-test</i>	<i>prj-data-dm-structure-ppd</i>	<i>prj-data-dm-structure-prod</i>
Finance	<i>prj-data-dm-finance-dev</i>	<i>prj-data-dm-finance-test</i>	<i>prj-data-dm-finance-ppd</i>	<i>prj-data-dm-finance-prod</i>
Marketing	<i>prj-data-dm-marketing-dev</i>	<i>prj-data-dm-marketing-test</i>	<i>prj-data-dm-marketing-ppd</i>	<i>prj-data-dm-marketing-prod</i>
Procurement	<i>prj-data-dm-procurement-dev</i>	<i>prj-data-dm-procurement-test</i>	<i>prj-data-dm-procurement-ppd</i>	<i>prj-data-dm-procurement-prod</i>

Data Quality & Final Views Projects

In addition to the domain-specific projects, a separate set of projects is used to:

- Import the final views generated by the domain projects.
- Define and execute data quality rules through **Dataplex**.

Environment	Project
Development	<i>prj-data-dq-selfservice-dev</i>
Testing	<i>prj-data-dq-selfservice-test</i>
Pre-Production	<i>prj-data-dq-selfservice-ppd</i>
Production	<i>prj-data-dq-selfservice-prod</i>

Project Support Teams

The successful implementation and maintenance of the DQMT solution is supported by a dedicated team, each contributing with specialized skills across different areas of the project:

Name	Role	Scope
Ahmed Elsayed	Data Architect	Architecture and design of data pipelines and models
Maria João Pimenta	Data Engineer	Data ingestion, transformation, and automation

Ram Atirajyam	Data Engineer	Data ingestion, transformation, and automation
Ibrahim Mansey	Visualization Engineer	Data visualization and dashboard development
Mohamed Hazem	Visualization Engineer	Data visualization and dashboard development
Rawan Shehab	Functional Analyst	Business analysis and functional requirements

Project Access and Service Accounts

Google Groups

The following Google Groups have access to the DQMT GCP projects, organized by role:

Group	Purpose	Email
Data Architects Group	Access for Data Architects	gcp-da-prj-data-dq-selfservice-nonprod@solvay.com
Data Engineers Group	Access for Data Engineers	gcp-de-prj-data-dq-selfservice-nonprod@solvay.com
Data Analysts / Business Analysts	No specific group	—
Data Developers Group	Access for Data Developers	gcp-dv-prj-data-dq-selfservice@solvay.com

Note: No new Google Groups were specifically created for this project.

Service Accounts

The following Service Accounts are used within the DQMT project for process automation and integration:

Service Account	Description
sbs-is-appli-qlikview.support@solvay.com	QlikView integration and support
sa-talend@prj-data-dq-selfservice-dev.iam.gserviceaccount.com	Talend jobs execution
sa-cloudfunction@prj-data-dq-selfservice-dev.iam.gserviceaccount.com	Cloud Functions automation
