STRUCTURE FOR PURCHASING

Business Term Definition

Material groups are grouped by segments. Segments are defined with category buyers and implemented group-wide, to share common ones whatever the system used (PF1_020 or WP1_400 or BP2_400 or WNP_400 or CONVERGENCE). "Segment" is the second level of the category taxonomy. (Segments are in fact categories, named in an old fashion way).

| Category Taxonomy | Scheme of classification of purchased goods and services related to the supply market. It enables category management, in aligning business goals and customer requirements with supply market capability and maximizing long-term value for the organization. This is achieved by using a three-level hierarchy consisting of domain, segment and material group. The domain and segment hierarchy is designed to be common and unique for vendors and items (goods and services). | Category Taxonomy |
