

PBI Structure

File Name: SAAMS Dashboard

Landing Page: Allows the navigation to 3 distinct views: Aggregated view, Detailed Analysis and Monthly Counts. In addition the user can also create its own dashbaords and analysis by using the "Explore Data" option, which opens a sandbox in pbi service.

The Aggregated view allows the user to visualize general information of Kpis, and to apply filters such as ControlGroup, Month-Year, Owner, KPI cluster, KPI code and SAP system. The user can also clear all applied filters or navigate to the other pages through the side bar.

In this page the user can see all the records associated with the kpis and also some big numbers which still need to be defined by the client. In this page the same filters apply as well as the navigation side bar.
