Business Term Status

The Business Term is currently **awaiting approval** by the Data Governance Committee.

Business Term Definition

The order type is a classification characteristic for orders. It consists of control information that is important for managing orders. The order type is client-based, which means that each order type can be used in all controlling areas.

Possible order categories are in-house production, external procurement, unrestricted-use stock, and sales order with consumption.

4 types of PO in SAP - The following procurement types exist:

- Standard
- Subcontracting
- Consignment
- Stock transfer
- External service
