Calculation

Average Score

Each GBU and Function represents the same weighted value of 1 out of the total number of GBUs and Functions. Equally each Service within a Process represents a weighted value of 1 out of all the services within the given process.

From the Raw Data :

1. calculation of the average that each GBU/Function gave to each Service
2. from those averages we calculate directly :
 - o Services score
 - o Process score
 - o GBU/Functions score
 - o Overall score

Net Promoters

It corresponds to the numbers of each score received from GBUs and Function split by the following scale :

- 4 or 5 => Promoter
- 3 => Passive
- 1 or 2 => Detractor
