## General Description - RCR (Recurring Complaint Rate)

Recurring Complaint Rate, or RCR, is a calculation of how many complaints vs the total complaints are flagged in SFDC as "recurring". This is calculated by the following equation:

$$RCR = (\# \text{ of Recurring Complaints} / \# \text{ of Total Complaints}) \times 100$$

The Recurring Complaint Rate by Month graph allows you to view your RCR based on a number of views (indicated in picture below). Use the cyclical to toggle the views or right click on it to select a view from the drop down:

The RCR Details allow you to see details of the RCR indicator in table format. Use the cyclical to toggle the view of this table as well:
