Process Expert

D&PS Expert
Miriam Luttrix

General Description

This page provides an analysis of the number of Credit Blocks that have occurred when Orders have been blocked for credit reasons.

****An order can be blocked several times due to several reasons (blocked types), these will only be counted once for each blocked type. Example: if an order is blocked several times for the same reason (blocked type), it will be counted once for the given blocked type. If an order is blocked once due to Tolerance and 2 times due to Overdue, they will be counted 2 times in total.**

It allows too to check this indicator in two ways: "Credit Blocks Trend" and "Distribution by BlockingType"

Credit Blocks Trend

Distribution by Blocking Type

"The Credit Blocks Trend" provide a chart, which relates # of credit blocks vs. # of blocked orders and a table where is possible to check the all the blocked orders split by type.

"Distribution by Blocking Type" provide another chart, which display the # of blocked orders split by type, besides the table where again is possible to check the all the blocked orders split by type.

Refresh Frequency:
Weekly (Every Tuesday)

KPI Name	Calculation
Credit Blocks	Key Figure Credit blocks Blocking type Overall status of credit checks
Blocked Orders	An order can be blocked several times with different blocking types but only counted once in the blocked orders KPI
%Credit Blocks	Credit Blocks = Active Orders

Blocking Type	Overall status of credit checks Tolerance Customer Credit Status > Credit Limit Payment Terms Deviation Customer Review Date Overdue Obsolete Check Comm Adv Pay Wait -H Customer blocked Secured Payment Comm. L/C wait -H Payment before Delivery Letter of Credit Payment before GI CREDIT CARD BLOCK
