General Description - Samples Leadtime

The Samples Leadtime tab allows users to see the leadtimes between sample requests and the sample shipping date in SAP. For Non SAP sample requests, the leadtime is tracked from the creation date to the manual shipping date. Use the button at the top of the graph to switch the view to the details. Use the cyclical at the bottom to filter by BU, Product Lvl 2, Manufacturing Plant, and customer classification views.

The processing leadtimes details view allows for more in depth analysis of the leadtime levels on the graph. See the average number of days samples at each leadtime level from L1 to L5. You can filter by SAP, Non SAP, and Not Yet Ordered samples using the buttons on the graph (highlighted below):

The Details table at the bottom shows details of the samples and their leadtime transitions (in days) from the different levels. You can toggle the dates or the indicated button. Double click the header of a column to sort by that column. Double click again to reverse the sort:
