

User Guide - Mobility Connections

Connect Using Mobile Devices

! Only devices that had enrolled under the Solvay Mobile Devices Management (MDM) are possible to connect to dashboards built using Qlik Sense. These mobile devices include:

- Mobile Phone (both Android & IOS)
- Tablet (both Android & IOS)
- ChromeBook

! It is recommended to connect using the Chrome Browser for ChromeBook users. Normally on the first connection to Qlik Sense dashboards, the Qlik Sense prompt will appear and you will have to enter the "User Name" and "Password". As long as you do not clear browsing history, you will not be prompted after.

User Name always begins with eua\ follow by your window ID (example: eua\llcheong)

Password will be your window login password

Log in

There are 2 ways of connecting via mobile devices:

1. Using Chrome Browser
2. Using Qlik Sense App (for mobile phones only)

Using Chrome Browser

This is the same as browser any internet page by opening the Qlik Sense Hub URL directly then select the dashboard you wanted to connect.

Using Qlik Sense App

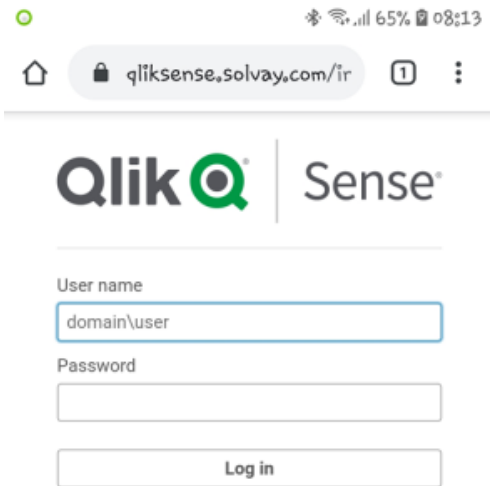

The app can be found in both App Store (IOS) and Play Store (Android)

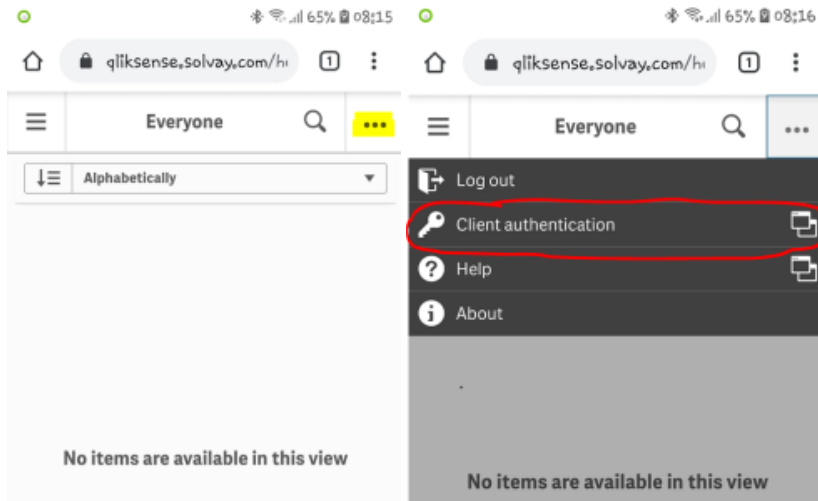

Search for Qlik Sense, download Qlik Sense Mobile from the list.

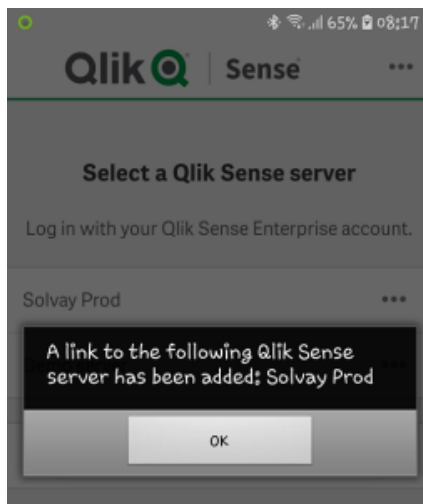

After download completed, open the Qlik Sense Hub link (<https://qliksense.solvay.com/hub/stream/aaec8d41-5201-43ab-809f-3063750dfafd>) from the Chrome Browser in the mobile phone. You will see the below prompt from Qlik Sense for "User Name" and "Password". Enter the "User Name" begins with eua\ and follow your window ID (example: eua\\lcheong) and finally your window password.

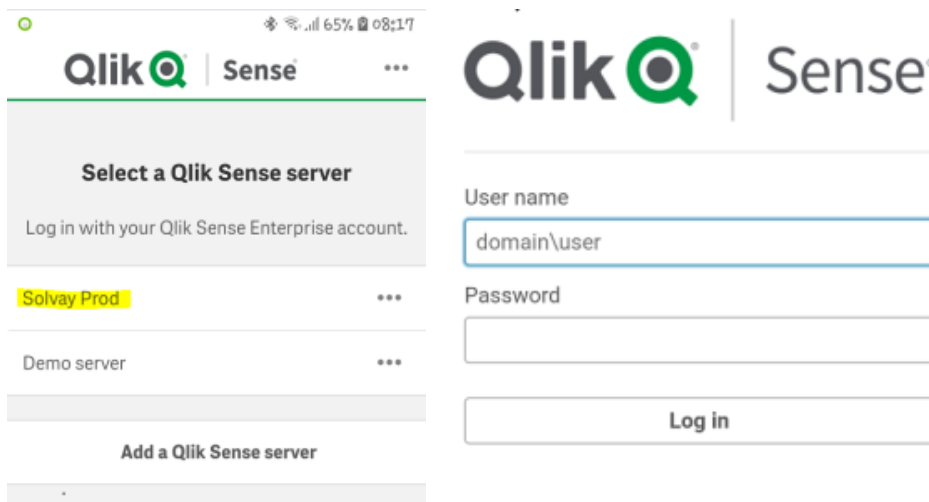

Once you had login successfully, you will see the below screen. Tap on the 3 dots (highlighted in yellow) and then tap on "Client Authentication" (as shown on the right image).

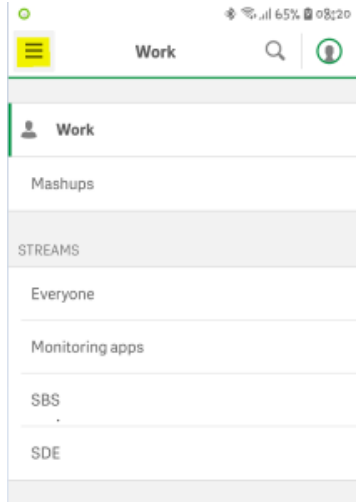

You will then see that the message informing server has been added. Tap on "Ok" and then logout Qlik Sense Hub page from the Chrome Browser.

Now launch the Qlik Sense Mobile App, you will find Solvay Prod, tap on it and the Qlik Sense prompt will appear, enter the "User Name" and "Password" the same way as you did earlier in the Chrome browser.

After you had login successfully, tap on the 3 lines (highlighted in yellow), you will see all the dashboards that you have access to, simply tap on the one you would like to connect to and you are ready to navigate the dashboard from your mobile devices.

To begins with connecting to Qlik Sense dashboards, always ensure that the device is connected to wifi - SOLVAY (as per shown in below) within Solvay sites (offices/plants). When connecting outside Solvay sites (example hotel/home), VPN is required to be activated.

Chrome Book	Tablet/Mobile Phone (Android)	Tablet/Mobile Phone (IOS)
<p>The screenshot shows the "Network" settings on a Chrome Book. Under the "Wi-Fi" section, "SOLVAY" is listed as "Connected" and is circled in white. Other networks listed include SLV_Guest, 4guest, SLV_Other_Devices, 2prism, BizbetaSV, and DIRECT-DXW-500736ms7U. A "Sign out" button and system tray (US, 16:04) are visible at the bottom.</p>	<p>The screenshot shows the "Wi-Fi" settings on an Android device. The Wi-Fi toggle is turned "ON". Under "CURRENT NETWORK", "SOLVAY" is listed as "Connected" and is circled in red. Under "AVAILABLE NETWORKS", other networks like 4guest, SLV_Guest, SLV_Other_Devices, 2prism, CH_Test, and ClickShare-TheHive are listed. The status bar shows 65% battery and 08:10.</p>	<p>The screenshot shows the "Settings" app on an iOS device. The "Wi-Fi" section is expanded, showing "SOLVAY" as the selected network with a checkmark. Other networks listed include 2prism, 4guest, CH_Test, SLV_Guest, and SLV_Other_Devices. The status bar shows 92% battery. The "Ask to Join Networks" toggle is turned off.</p>
