

Colmar Dashboard

Process Owner

François Carette
Performance & Capex Reporting Manager - GEC

D&PS Expert

Marie-Line Ardito

General Description

COLMAR = Capex Overall Lifecycle Management, Approval and Reporting

COLMAR tool contains the list of all investments projects, already started or planned.

It gives a consistent picture of the GBU's investment needs, and plans.
Integrated with SAP, COLMAR is fed with actual project expenses : CAPEX and CAPSPEND.

People in charge of the Investment portfolio are updating quarterly forecasts.

The dashboard can be used to control and adjust the process to authorise new projects to reach the target for CAPEX and CAPSPEND (at a Solvay group level or by GBU).
The analysis can be done from the top level (Solvay group) to more detailed levels : GBU, plant, project.

Target Users

- Industrial
- Controlling
- Research & Innovation
- Facilities
- SBS IS

Authorization & Rights

All the accesses must be validated by the

GBU Capex Coordinators

Authorisations' rights per GBU, Zone or Plant
