1. Objective and Scope

1.1. Objective of this Operation

The purpose of this procedure is to explain how to recalculate and activate transfer prices in the TRSA table on a monthly basis.

2. Definitions

See:

- [TSRA Table](#)
- [HUSP Table](#)

3. Tasks description

- Execute new Unit TP calculation for Cost Plus transactions.
- Execute HUSP table and activate sales prices for the period to do the price less calculation.
- Execute new Unit TP calculation for Price Less transactions.

3.1. I execute new Unit TP calculation for C+ Transactions

WP1: TPs are calculated based on the Standard price of the products in the Delivering entity. The Standard prices are released on day 1 of each month. Therefore, this task should be processed in WP1 on D+3 of each month, so we could guarantee that no prices modifications are going to be made, due the closing period.

PF1: TPs are calculated based on the actual prices of the products in the Delivering entity. The actual moving price is released usually on D+2 (after Material ledger closing). Therefore, this task should be processed in PF1 on D+4 of each month.

3.1.1. I access TP table ZFI_TP_REPORT in WP1 and PF1

Go to transaction ZFI_TP_REPORT

- Select variant "NEW-C+TT"

Monitor TP - TSRA and HUSP tables

Transaction type: TOLLING, OTHER_C+, FLOW_THRU, CON/MANUF, C+MANUF, COST_MANUF.

Status: 2 to 5

Requested Valid From Date: First day of the current month.

Table update and monitoring options

Upload, Download & Delete transactions or unit sale prices from a file
 Review record and monitor the status
 Perform a new Unit TP calculation

Transaction Type: TOLLING to

Status: 2 to 5

Requested Valid From Date: 01.04.2025

Multiple Selection for Transaction Type

Select Single Values (6) | Select Ranges | Exclude Single Values | Exclude Ranges

O.. Single value

- TOLLING
- OTHER_C+
- FLOW_THRU
- CON/MANUF
- C+MANUF
- COST_MANUF

Execute the transaction.

The prices will be available for activation with status "3-To be activated" in the TSRA table, section "Review record and monitor the status".

3.2. I execute HUSP table and activate Sales prices

This data for Historical Sales price comes from BW P&L of each entity. Therefore, the task should be processed after D+3 of each month, so we could guarantee that no prices modifications are going to be made, due the closing period.

- WP1: There is an automatic job for WP1 which loads BW data to the HUSP table when sales is closed (usually after D+2).
- PF1: Before proceeding with task 3.2.1, execute the transaction with variant 'ECO_HUSP' (Upload Sale price from BW file). Then the Sales price from BW data will be available in HUSP for activation.

3.2.1. Go to transaction ZFI_TP_REPORT and select HUSP table

Click on "Review record and monitor the status"

Selection table: HUSP

Month and Fiscal Year: 0MM.YEAR (current period)

Status: 1

Table update and monitoring options
