

Creating Functional Specifications

The purpose of this guide is to outline how create various functional specifications using Confluence templates.

Creating Functional Specifications

Go to the parent page of the respective functional specification, enter the title for the page, and click create.

Enhancement Specifications

Created by LEIGHTON-ext, Dean, last modified by MUTHUSAMY-ext, Kunalan just a moment ago

Enhancement specification is required for the following custom development types:

- Application Job (Custom)
- Conversion Custom Build with Development Id
- Enhancement
- Modification
- Program

To create an enhancement specification page, enter the title with the following format and click create.

- **<Jira ID> <Short description>** where Jira ID and short description matches with the corresponding Jira development card that is created. For example: ERP-10 Set Billing Block in Sales Order
- For Conversion Custom Build, please state the corresponding conversion ID. For example: ERP-10 Set Load Program for CNV-1000

Limit to 255 Characters **Create Enhancement Specification**

Title: State: Changed: Updated by:

No data found

Ensure you review the [Specification Acceptance Checklist](#) while creating the document to ensure smooth passage through the [review process](#).

Appendix

Links to Jira

Use the Jira macro to link FS to their corresponding Jira request and development cards.

Q

Search using any issue key, search URL, Jira link, JQL, plain text or filter

	Key	Summary
<input checked="" type="checkbox"/>	ERP-27	test

Labels

Labels are automatically added when functional specification are created. See below, to understand how labels are used

- The initial status is "In Progress". If you do not see the status, check if "functionalspec" label has been tagged to the document.

Created by MUTHUSAMY-ext, Kunalan about 2 hours ago ● In Progress

Status	● In Progress
Owner	
Stakeholders	

- Labels corresponding to FS types are added for reporting purposes.

Template	Label
Functional Specification - Enhancement	enhancement
Functional Specification - Form	form
Functional Specification - Interface	interface
Functional Specification - Story Definition	report
Functional Specification - Data Model	report
Functional Specification - User Interface	ui
Functional Specification - Workflow	workflow
