

ALB Data Ingestion - Add new data to the data lake

I have a new data source (file, spreadsheet, table) that needs to be available in the data lake and the data should be available for transformations and aggregations.

Step-by-step guide

N#	Step	Details
1	Copy the mapping spreadsheet template and fill it following the instructions on the file. If you don't know the data source, please, validate the mapping with the Product Owner of the source system/file.	
2	Create a JIRA Ticket on the board of the project and attach the mapping document.	Title: [ETL - Data Ingestion - Workflow/Method/Subject] Description: "As a [persona/role], I [want to], [so that]. Acceptance Criteria: " + Attach mapping document, data samples and other important files or documents.
