Acronym for Managed File Transfer

### Label(s)

**Managed File Transfer** Created May 28, 2025 (14:30) by PAWLACZYK-ext, Kacper , last modified May 28, 2025 (14:30) by PAWLACZYK-ext, Kacper

### Definition

[Link](#) [Link](#)

Managed file transfer is a technology that provides the secure transfer of data in an efficient and a reliable manner. Unlike traditional file transfer tools, such as FTP and scripting, MFT core functionalities include the ability to secure files in transit and at rest, and reporting and auditing of file activity. What also differentiates MFT from other forms of infrastructure and integration technologies is its unique focus on managing the transfer of large file sizes and volume.
