

CNV-3007 Business Partners - General (Role 000000)

Status	Approved
Owner	RUAN-ext, Eric CELEDONIO-ext, Arnold MADHOK-ext, Jasleen
Stakeholders	

Purpose

The purpose of this document is to define the conversion approach to create Business Partners - General in S/4 HANA.

In SAP ECC, customer and vendor master data are maintained separately as distinct entities. Customers are managed through Customer Master Data, while vendors are handled via Vendor Master Data. These records store essential details such as company name, address, payment terms, Bank Details and tax information.

In SAP S/4HANA, the Business Partner (BP) concept replaces the traditional customer and Vendor master data approach. The BP model integrates both customer and vendor roles into a single entity, simplifying data management and ensuring consistency across different business functions

Conversion Scope

The scope of this document covers the approach for converting active Customer Master Data General and Vendor Master General from Legacy Source Systems into S/4HANA Business Partner (BP) General (Role 000000) Master Data Design Standard.

Customer Master Data - General Information

The data from legacy system includes:

1. Customer with AR Balance under the company codes within S4 Hana implementation scope (BSID-KUNNR).
2. or There is usage for the customer in the sales document within 4 years, and the sales organization for the sales documents is within scope. * modified on 31/Oct/2025
3. or There is usage for the customer in the finance document within 4 years, and the company code for the finance documents is within scope. . * modified on 31/Oct/2025
4. ~~or Customer is part of Customer Hierarchy Higher Node, and the sales area data is part of the sales areas within migration scope~~
5. or there is customer consignment stock and the plant for the consignment stock is within S4 Hana implementation scope.
6. or Customer is set as the credit account for other customers, and either the customer or credit account customer is not deleted. (if both customer or credit account is deleted, then not in migration scope)
7. Intercompany customer will be defined based on the Enterprise structure. (To identify Intercompany customer, trading partner will be used. In the meantime, Group field(KNA1-KONZS) from customer general data will be used. For WP2/PF2, Group value = 0000810135 (Syensqo))
8. or the customer in the partner function is active, then the parent customer will also be migrated. * added on 16/Oct/2025
9. or the customer is active in Salesforce and there are activities within 48 months.* added on 16/Oct/2025
10. or there is an existing forecast for the customer in Kinaxis. * added on 16/Oct/2025
11. ~~or there is active master data for the customer, such as active Pricing Condition records. * added on 16/Oct/2025 * removed on 15 Jan 2026~~

Criteria	Relevancy Rule	Technical Details
1	Customer with AR Balance under the company codes within S4 Hana implementation scope	Select KUNNR from BSID where BSID-BUKRS in (Company code in scope)

2	or There is usage for the customer in the sales document within 4 years, and the sales organization for the sales documents is within scope	<p>Select KUNNR from KNA1 where KNA1-LOEVM="" and KNVV-KUNNR = KNA1-KUNNR AND KNVV-VKORG in (Sales Org in scope) and KNVV-LOEVM="" and usage within 4 years.</p> <ol style="list-style-type: none"> 1. Accounting document (Select MAX(BSAD/BSID-CPUDT) where BSAD /BSID-KUNNR =KNA1-KUNNR and BSAD/BSID-BUKRS = (Company code in scope)) 2. Sales Document (Select MAX(VBAK-ERDAT) WHERE VBAK-VBELN=VBPA-VBELN AND VBPA-KUNNR = KNA1-KUNNR) 3. Delivery Document (Select MAX(LIKP-ERDAT) WHERE LIKP-VBELN=VBPA-VBELN AND VBPA-KUNNR = KNA1-KUNNR) 4. Billing (Select MAX(VBRK-ERDAT) WHERE VBRK-VBELN=VBPA-VBELN AND VBPA-KUNNR = KNA1-KUNNR)
3	or There is usage for the customer in the finance document within 4 years, and the company code for the finance documents is within scope.	<p>Select KUNNR from KNA1 where KNA1-LOEVM="" and KNB1-KUNNR = KNA1-KUNNR AND KNB1-BUKRS in (Company code in scope) and KNB1-LOEVM="" and usage with 4 years</p> <ol style="list-style-type: none"> 1. Accounting document (Select MAX(BSAD/BSID-CPUDT) where BSAD /BSID-KUNNR =KNA1-KUNNR and BSAD/BSID-BUKRS = (Company code in scope)) 2. Sales Document (Select MAX(VBAK-ERDAT) WHERE VBAK-VBELN=VBPA-VBELN AND VBPA-KUNNR = KNA1-KUNNR) 3. Delivery Document (Select MAX(LIKP-ERDAT) WHERE LIKP-VBELN=VBPA-VBELN AND VBPA-KUNNR = KNA1-KUNNR) 4. Billing (Select MAX(VBRK-ERDAT) WHERE VBRK-VBELN=VBPA-VBELN AND VBPA-KUNNR = KNA1-KUNNR)
4	or Customer is part of Customer Hierarchy Higher Node, and the sales area data is part of the sales areas within migration scope	Select HKUNNR from KNVH where KNVH-VKORG in (Sales Org in scope)
5	or there is customer consignment stock and the plant for the consignment stock is within S4 Hana implementation scope.	Select KUNNR from MSKU where MSKU-WERKS in (Plant in scope)
6	or Customer is used for Credit Limit Reference in Credit Management, only when the credit account is different from the customer, and at least credit account or customer is still active.	Select KNKLI from KNKK where KNKK-KKBER = T001CM-KKBER and T001CM-BUKRS in (Company Code in scope based on the sales organization) where KNKK-KUNNR<>KNKK-KNKLI AND (KNA1-LOEVM is initial where KNA1-KUNNR = KNKK-KUNNR or KNA1-LOEVM is initial where KNA1-KUNNR = KNKK-KNKLI)
7	Intercompany Customer is in migration scope, but it will be use Data Collection Template to collect the information	KNA1- VBUND <>" or KNA1-KONZS = 0000810135 or 0000800001
8	or the customer in the partner function is active and in migration scope (based on rule 2), then the parent customer will also be migrated. * added on 16/Oct/2025	<p>Select KNVP-KUNNR INNER</p> <p>JOIN KNA1 as a WHERE KNVP-KUNNR = a.kunnr and a.loevm = X and KNVP-VKORG in 'Sales Org in scope'</p> <p>inner join kna1 as b where knvp-kunn2 = b.kunnr and b.loevm = " and kunn2 in rule 2</p>
9	or the customer is active in Salesforce and there are activities within 48 months.	<p>Two reports will be provided.</p> <p>iCare - If (there is value in field 'PRS Code (Account)' or 'RCS code (Account)') and 'Last Activity' is within 48 months and Type <> "Inactive Customer", then the account is in scope. 'PRS Code (Account)' is mapped to PF2 customer number, 'RCS code (Account)' is mapped to WP2 customer number.</p> <p>Core CRM - If (there is value in field 'PRS ID / RCS ID') and 'Last Activity' is within 48 months and 'Account Organization' = 'SCO' and 'Status'<>"Rejected", then the account is in scope. 'PRS ID / RCS ID' need to split using "/" to get the PRS/RCS code and 'GBU' in (Novecare, Technology Solutions).</p>
10	or there is an existing forecast for the customer in Kinaxis.	<ul style="list-style-type: none"> • This will be parked for now

44	<p>or there is relevant Pricing Condition records maintained for the customer 4 years ago.</p> <p>a. The relevant condition table will be provided, which includes the customer field</p> <p>b. The price valid from date is >= current date - 4 years</p> <p>c. Based on the selection criteria mentioned in a&b to select the condition header index table (KONH), then use it to match the customer number. If there is match, then the customer is taken into consideration.</p>	Select KNA1 KUNNR from KONH where KONH KOTABNR IN (List to be provided) and KONH DATAB >= current date - 4 years and KONH VAKEY CS-KNA1 KUNNR
----	---	--

The data from legacy system excludes:

1. One time customer (Account group is Z004 or ZCPD)

Criteria	Relevancy Rule	Technical Details
1	One time customer (Account group is Z004)	KNA1-KTOKD = Z004 or ZCPD

Vendor Master Data - General Information

The data from legacy system includes:

1. Vendors' relevant general data with potential duplicate records (refer Relevancy Criteria for Vendor inclusion)
2. Vendors' relevant general data with potential missing information such as bank, tax related fields
3. Vendors LFA1-LIFNR listed in the Inclusion DCT table,
4. Business Partners which are not in legacy that may have been created via DCT including intercompany/plant vendors.

The data from legacy system excludes:

1. Vendors marked for deletion (refer Relevancy Criteria for Vendor exclusion)
2. Inactive vendors with no transactions for the past 4 years if Material Type <> ZIND/ZABF material types and 5 years for ZIND/ZABF material types.
3. Vendors LFA1-LIFNR listed in the Exclusion DCT table,

-----	--	-----	---------	-----

Relevancy Criteria for <u>Vendor</u> :		Rules
Relevancy rules - All must be true for the Vendor to be considered for relevancy		
1	Deletion Flag as no longer used anywhere in system (unless Vendor has open transactions: Open PO/AP /Contract)	where Vendor does not belong to the conditions below 1. LFA1-LOEVM = 'X' or 2. LFA1-ZZR_ZLATR8 = ZBY (Unauthorized Vendor requested by Buyers)
2	Has at least one valid extension (unless Vendor has open transactions: Open PO/AP/Contract)	having entry in LFB1/LFM1 where LOEVM <> 'X' with Company Code/Purchasing Organization in scope
3	Exclude Inter-company suppliers (identified with class G - group)	where ZZR_SEGT_ATTR <> 'G'
4	Exclude employees as well where Account groups: (ZZPE / Z012)	if zSource = 'PF2' and KTOKK <> 'ZZPE' if zSource = 'WP2' and KTOKK <> 'Z012'
Additional rules - Only one needs to be true for the Vendor to be 'relevant' [only Vendor that have passed 'Relevancy rules' above are included]		
1	Has Purchase Order and Contract created last 4 yrs if Material Type <> ZIND/ZABF material types	where Vendor has PO created (EKKO-AEDAT in past 4 yrs) and EKKO-BSTYP in (F,K) and EKKO-LOEKZ<>X and (EKORG/BUKRS/WERKS in-scope)
2	Has Cleared Items created last 4 yrs if Material Type <> ZIND/ZABF material types	where LIFNR has AP clearing date (BSAK-AUGDT in past 4 yrs) and (EKORG/BUKRS /WERKS in-scope)
3	Has a valid Contract	where Vendor has Contract created (EKKO-KDATE >= <i>Current-Date</i> and EKKO-BSTYP=K and EKKO-LOEKZ<>X and (EKORG/BUKRS/WERKS in-scope)
4	Has and open purchase order	where Vendor has PO (EKKO-BSTYP=F and and EKKO-LOEKZ<>X and EKPO. EREKZ=" and EKPO-LOEKZ<>X and (EKORG/BUKRS/WERKS in-scope)
5	Is a valid Partner in PO/SO created last 4 yrs if Material Type <> ZIND/ZABF material types	here Vendor having entry in EKPA-LIFN2 (PO created in last 4 yrs) or in VBPA-LIFNR (SO created in last 4 yrs)
6	Vendor created in the last 6 months	where <i>Current-Date</i> < LFA1-ERDAT > <i>Current-Date - 6 months</i>
7	Is linked to a valid Customer	where Vendor is linked to a relevant Customer (KNA1-LIFNR)
8	Has Open Items Not Cleared	where Vendor has an entry in BSIK-LIFNR (within legal company code in scope)
9	Is One-Time Vendor	where Vendor Segment Class LFA1-ZZR_SEGT_ATTR is 'D' (for info only / no activity checks required)
10	Last purchase order transaction date	Vendor's max(EKKO-AEDAT) where and EKKO-BSTYP=F and EKKO-LOEKZ<>X (for info only / no activity checks required)
11	Has Purchase Order and Contract created last 5 yrs (only for ZIND/ZABF material types)	where Vendor has PO created (EKKO-AEDAT in past 5yrs) and EKKO-BSTYP in (F,K) and EKKO-LOEKZ<>X and EKPO-LOEKZ<>X and EKPO-MATNR in (MARA-MATNR where MARA-MTART in S4(ZIND/ZABF)) and (EKORG/BUKRS/WERKS in-scope)

12	Has Cleared Items created last 5 yrs (only for ZIND /ZABF material types)	where LIFNR has AP clearing date (BSAK-AUGDT in past 5 yrs) and BSAK-EBELN in (EKPO-EBELN and and EKPO-LOEKZ<>X and EKPO-MATNR in (MARA-MATNR where MARA-MTART in S4(ZIND/ZABF)) and (EKORG/BUKRS/WERKS in-scope)
13	Has Purchase Requisitions in the last 4 yrs if Material Type <> ZIND/ZABF material types	where Vendor has PR created (EBAN-AEDAT in past 4 yrs) and EBAN-BSTYP=F and EBAN-LOEKZ<>X and (EKORG/BUKRS/WERKS in-scope)
14	Has Process Orders with external procurement in the last 4 yrs if Material Type <> ZIND/ZABF material types	where (PLAF-PSTTR in past 4 years) and (PLAF-SOBES=0) and (PLAF-FLIEF is not Intercompany & Employee) and (EKORG/WERKS in-scope)
15	Has Valid SourceList	where LFA1-LIFNR = EORD-LIFNR and EORD-BDATU >= <i>Current-Date</i> and (EKORG /BUKRS/WERKS in-scope)
16	Has valid PIR (Purchase Info Records)	where EINA / EINE (LOEKZ<>X) and (EKORG/BUKRS/WERKS in-scope)
17	Is a valid Partner in PO/SO created last 5 yrs (only for ZIND/ZABF material types)	where Vendor having entry in EKPA-LIFN2 (PO created in last 5 yrs) or in VBPA-LIFNR (SO created in last 5 yrs) where MARA-MTART in S4(ZIND/ZABF)
18	Has Purchase Requisitions in the last 5 yrs (only for ZIND/ZABF material types)	where Vendor has PR created (EBAN-AEDAT in past 5 yrs) and EBAN-BSTYP=F and EBAN-LOEKZ<>X and MARA-MTART in S4(ZIND/ZABF) and (EKORG/BUKRS/WERKS in-scope)
Exception Rules (disregard all above rules)		
1	Has VAT changed last 4 yrs	where Vendor EKPA-LIFN2 used in Partner Function EKPA-PARVW 'IP' (Invoice Presented By) and 'VN' (Vendor) is different in open PO.
2	Inclusion/Exclusion List	Force any vendors to be included or excluded.

Exclude given list of Vendors from Activity based checks:

1	We should exclude activity checks for Vendors which are extended to Company Code view only (Finance Vendors)- Invoicing Partner/Banks	LFA1-LIFNR not in LFM1 and Vendor does not belong to the conditions below 1. LFA1-LOEVM = 'X' or 2. LFA1-ZZR_ZLATR8 = ZBY (Unauthorized Vendor requested by Buyers)
2	We need to check Vendor 'Partner Function' role also (OA, PI) even if they are not extended to any company code or purchasing org. If active Vendors are used as only invoicing Party or as Ordering Address then those vendors will not have any POs.	WYT3-PARVW = 'OA' or 'PI' and Vendor does not belong to the conditions below 1. LFA1-LOEVM = 'X' or 2. LFA1-ZZR_ZLATR8 = ZBY (Unauthorized Vendor requested by Buyers)
3	Catalog suppliers (even if they are not extended to any company code or purchasing org)- identified in the attribute 6 field	ZZR_ZLATR6 = 'CEA' or 'CIA' or 'CIM' or 'COA', or 'CSA' and Vendor does not belong to the conditions below 1. LFA1-LOEVM = 'X' or 2. LFA1-ZZR_ZLATR8 = ZBY (Unauthorized Vendor requested by Buyers)

4	Commission Agents (39*****) where account group is 'ZXAG' even if they are not extended to any company code or purchasing org.	where KTOKK = 'ZXAG' and Vendor does not belong to the conditions below 1. LFA1-LOEVM = 'X' or 2. LFA1-ZZR_ZLATR8 = ZBY (Unauthorized Vendor requested by Buyers)
5	Not used/Duplicate/VATchange	LFA1-ZZR_ZLATR8 = ZVN (for info only) and Vendor does not belong to the conditions below 1. LFA1-LOEVM = 'X' or 2. LFA1-ZZR_ZLATR8 = ZBY (Unauthorized Vendor requested by Buyers)

Additional Information

Multi-language Requirement

The customer and vendor general data may contain international address. Therefore, the conversion will also need to support the multi-language address. Below languages (International versions) are supported.

International Version	Description
C	Simplified Chinese
M	Traditional Chinese
R	Cyrillic
K	Kanji (Japanese)
A	Arabic
3	Korean
T	Thai
H	Hangul

Document Management

It is possible the customer or vendor has attachment in the legacy system. The migration of attachment will be captured in conversion spec CNV-3004 - Attachment for customer master data and CNV-3031 Vendor Doc Attachments.

Legal Requirement

CMMC 2.0 is a mandatory DoD cybersecurity certification for contractors handling Controlled Unclassified Information (CUI) and Federal Contract Information (FCI). CUI includes sensitive technical data (e.g., design specs, system info) related to U.S. military and space applications. The Composites Business handles CUI and is therefore within CMMC scope. Without certification, the business risks disqualification from existing and future DoD programs.

It is mandatory to implement CMMC-compliant systems and processes to for all the organizations that are dealing with CUI. Therefore, there will be one SAP instance specifically for CUI related entities.

Special Requirements

If the data conversion involves third-party systems or external data sources, such as Icertis, describe any additional requirements related to data mapping, transformation logic, validation rules or security measures that must be followed.

Customer Master Data - General Information

A. Different SAP Instance Migration Approach

Due to compliance requirement, there will be one SAP instance for Rest of the World (ROW), one for China and one for CUI. For BP general data, the same data will be created in all 3 SAP instances as it is Tier 1 object with central data governance and maintenance rule.

1. For entities in China, the data will be loaded into SAP China instance while the entire migration process will remain the same as rest of the world.

Please refer to the link for the entity mapping for each instance. [SAP instance mapping based on company code](#)

~~To identify the record is for which SAP instance, it will follow below logic. If the same customer is mapped to multiple instances, the customer general data will be migrated in the respective SAP instance.~~

1. For customer with company code view in scope, map the company code to the SAP instance based on the mapping file.
2. For customer with sales view in scope, map the sales org to company code first, then map the company code to the SAP instance based on the mapping file.
3. Reconcile the result from step 1/step 2, and remove duplicate based on Customer/SAP Instance combination.

B. WP2/PF2 Customer General Data Reconciliation

In the meantime, for WP2/PF2 customer master general data, it is possible they are both coming from the same MDM PRS system, therefore, a de-duplication or reconciliation needs to be performed based on below logic.

1. In PF2, it will have the relationship that KNA1-ZZR_KUNNR_RCS (RCS Customer code) = WP2, KNA1-KUNNR, then it refers to the same customer.
2. In WP2, it will have the relationship that KNA1-ZZR_KUNNR_PRS (PRS Customer code)= PF2, KNA1-KUNNR, then it refers to the same customer.

C. Intercompany BP General Data

For Intercompany BP, it is in the migration scope. However, as the definition of the to-be Intercompany BP is different from the existing ECC Intercompany BP definition, instead of migrating the ECC Intercompany BP directly, a DCT will be utilized to collect the intercompany information, then map to the ECC customer/vendor number if applicable.

Grouping	BP Grouping	From Number	Comments
BPAB	Intercompany Business Partner - Trade	ICTXXXX	where XXXX is company code
BPAB	Intercompany Business Partner - Non Trade	ICNXXXX	where XXXX is company code
BPAB	Plant	PLYYYY	where YYYY is plant code
BPAB	Plant	PYYYYY	where YYYY is plant code

D. BP Number Range

In the BAU (business as usual) scenario, the BP number range for external parties will be Internal number range, meaning SAP will generate the running number based on the sequence of creation. For the migration purpose, it will adopt the external number range, which means each partner will have a pre-defined number when migrating to S4 Hana system. The consideration for this set up is to prepare the R3 customer migration in salesforce to keep the number in sync in both Salesforce and S4 Hana. Although the migration is using external number range, the pattern will be the same as internal number range.

Grouping	BP Grouping	From Number	To Number
BP02	Internal Numbering for standard use	1000000	99999999

E. One-time Customer

One time customer will not be migrated directly. However, if there is one time customer used in the open sales documents, or AR, a corresponding customer will be created as a normal customer.

Vendor Master Data - General Information

A. Different SAP Instance Migration Approach

There're three target SAP S4 Hana instances which will follow the following approach -

- Rest Of The World (All remaining entities from rest of the world will be loaded into S4 Hana Rest Of The World instance)
- China (Entities in China will be loaded into S4 Hana China instance)
- CUI US (Entities in CUI will be handled by US based data consultant)

The following logic is being used to identify record for SAP ROW Instance.

1. Vendor has purchasing organization or company code attributes data in below entities.
2. If vendor being used in both ROW entities and others, then General attributes data needs to be created in both SAP ROW and others instances.

SAP ROW Instance Specific Company Codes	SAP ROW Instance Specific Purchasing Organization
TBD	

The following logic is being used to identify record for SAP China Instance.

1. Vendor has purchasing organization or company code attributes data in below entities.
2. If vendor being used in both China entities and others, then General attributes data needs to be created in both SAP China and other instances.

SAP China Instance Specific Company Codes	SAP China Instance Specific Purchasing Organization
TBD	

The following logic is being used to identify record for SAP CUI Instance.

1. Vendor has purchasing organization or company code attributes data in below entities.
2. If vendor being used in both CUI entities and others, then General attributes data needs to be created in both SAP CUI and other instances.

SAP CUI Instance Specific Company Codes	SAP CUI Instance Specific Purchasing Organization
TBD	

Target Design

3007-006	C2	Vendor - Marked for Deletion (Reduce Scope)	1) if Central Posting Block (LFA1-SPERR) = X or 2) if Central imposed purchasing Block (LFA1-SPERM) = X or 3) if Central Archiving Flag (BUT000-XDELE) = X or 4) if Central Block for Business Partner (BUT000-XBLCK) = X or 5) LFA1-SPERQ - 'Block Function' is = code 99 (total block) 6) LFA1-ZZR_ZLATR8 - 'ZBY' Unauthorized Vendor or 'ZVN' Obsolete vendor - not used / Duplicate / VAT changed 7) if (LFB1-SPERR and LFB1-LOEVM) = X - For Specific Company Code 8) if (LFM1-SPERM and LFM1-LOEVM) = X - For Specific Purchasing Organization	Report to reduce scope	PF2/WP2
3007-007	C2	Relevancy report	Create vendor report with all LFA1 fields relevancy flags from Vendor Relevancy plus the additional flags below: 1. zActive_PO_Spares - If Vendor is present in EKKO table where EKKO-BSTYP=F and EKKO-LOEKZ <> X and EKKO-AEDAT in last 5 years (within in scope – Company Code, PurchOrg) and PO has item in EKPO (within in-scope plant) then this flag is set to 1 and material is an indirect material where EKPO-MATNR found in MARA and MARA-MTART identified in the link sheet below as ZIND under the Material Types Definition tab. 2. zActive_AP_Cleared - where Vendor has an entry in BSAK-LIFNR in the last 7 years (within legal company code in scope) 3. zReturn_Vendor - where LFM1-KZRET=X	Info report for relevancy analysis	PF2/WP2
3007-008	C2	Non-English characters check	Vendor names & addresses where LFA1-SPRAS= 'EN' that are containing non-english characters.	Report to ensure readability of vendor information.	PF2/WP2
3007-009		Additional Validation Reports will be added in Validation_Reports_link			

Conversion Process

The high-level process is represented by the diagram below:

The ETL (Extract, Transform, Load) process is a structured approach to data migration and management, ensuring high-quality data is seamlessly transferred across systems. Here's a breakdown of its key components:

1. Extraction

The process begins with extracting metadata and raw data from source systems, such as Syensqo ECC system (i.e., WP2/PF2) periodically. The extracted data is then staged for transformation.

It will extract the customer and vendor master data related table, such as KNA1/LFA1/KNVV/KNB1/LFB1/LFM1/ADRC/ADR2/ADR3/ADR4/ADR5/ADR6/LFBK/BNKA/DFKKBPTAXNUM, etc.

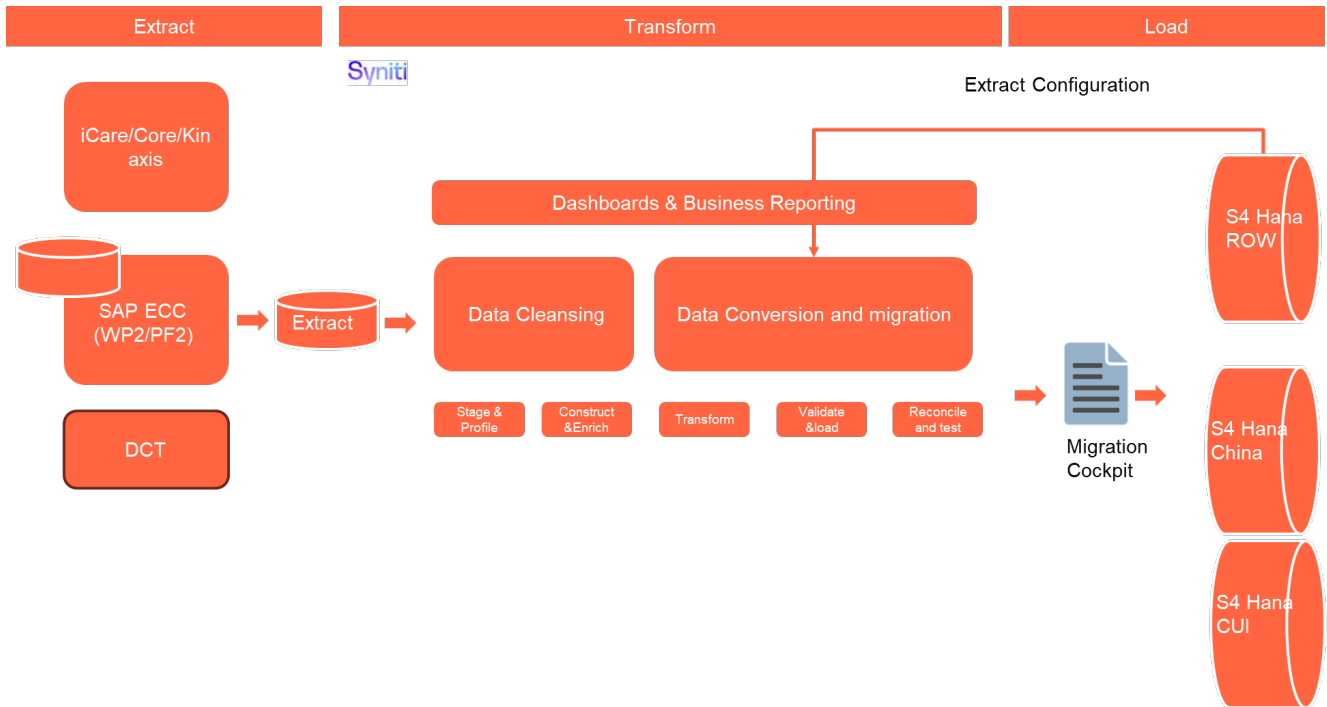

2. Transformation

Once extracted, the data undergoes cleansing, consolidation, and governance. This step ensures data integrity, consistency, and compliance with business rules. The transformation process includes:

- Data validation to remove inconsistencies.
- Standardization to align formats across datasets.
- Business rule application to refine data for operational use.

3. Loading

The transformed data is then loaded into the target S4 Hana system. SAP Migration cockpit will be used to migrate the Customer/Supplier separately. If the Business partner is customer and vendor in the same time, the BP general information will be in the Customer loading file.

The high-level process for vendors, where there is no source data, is represented by the diagram below:

Data Privacy and Sensitivity

N/A

Extraction

Extract data from a source into Syniti Migrate for SAP ROW and SAP China relevant entities. There are 2 possibilities:

1. The data exists. Syniti Migrate connects to the source and loads the data into Syniti Migrate. There are 3 methods:
 - a. Perform full data extraction from relevant tables in the source system(s).
 - b. Perform extraction through the application layer.
 - c. Only if Syniti Migrate cannot connect to the source, data is loaded to the repository from the provided source system extract/report.
2. The data does not exist (or cannot be converted from its current state). The data is manually collected by the business directly in Syniti Migrate. This is to be conducted using DCT (Data Collection Template) in Syniti Migrate

The agreed Relevancy criteria is applied to the extracted records to identify the records that are applicable for the Target loads.

Extraction Run Sheet

Req #	Requirement Description	Team Responsible
-------	-------------------------	------------------

Extraction Scope Definition	<ul style="list-style-type: none"> - Identify the source systems and databases involved. - Define the data objects (tables, fields, records) to be extracted. - Establish business rules for data selection. <p>Major tables to be extracted are KNA1/LFA1/KNVV/KNB1/LFB1/LFM1/ADRC/ADR2/ADR3/ADR4/ADR5/ADR6/LFBK/BNKA,/DFKKBPTAXNUM</p>	Data team
Extraction Methodology	<ul style="list-style-type: none"> - Specify the extraction approach (full, incremental, or delta extraction). For this object, it will be full extraction. - Determine the tools and technologies used. - Define data filtering criteria to exclude irrelevant records. 	Syniti
Extraction Execution Plan	<ul style="list-style-type: none"> - Establish execution timelines and batch processing schedules. - Assign responsibilities for extraction monitoring. - Document dependencies on other migration tasks. 	Syniti
Data Quality and Validation	<ul style="list-style-type: none"> - Define error handling mechanisms for extraction failures. 	Syniti

STRAS	STREET	<p>Display only</p> <p>link to Customer master table KNA1</p>
LAND1	COUNTRY	<p>Display only</p> <p>link to Customer master table KNA1</p>

BPKIND	BP Type	Mandatory Key link to table TB004, limit to value 9003 (Sales Agent)
TEXT40	BP Type Description	Display only link to table TB004

~~B. Collect Customer Delivery Date Rule~~

Field Name	Field Description	Rule
KUNNR	Customer Number	Mandatory Key link to Customer master table KNA1. Prepopulate the customer number for (Ship To / Sold To)
NAME1	Customer Name	Display only link to Customer master table KNA1
DELIVERY_DATE_RULE	Delivery Date Rule	Display only link to Customer master table KNA1
TEXT40	Delivery Date Rule Description	Display only

C. Collect India customer tax related information

Field Name	Field Description	Rule
KUNNR	Customer Number	Mandatory Key link to Customer master table KNA1. Prepopulate the customer number for India customer only
NAME1	Customer Name	Display only link to Customer master table KNA1
GST_TDS	GST TDS Registration	Applicable for India only. Maintain when the customer is registered for GST TDS under Section 51 of the CGST Act. Mandatory for customers liable for TDS as per Indian tax law. Not applicable for customers outside India or where TDS does not apply.
J_1IPANNO	Permanent Account Number	Applicable for India. Mandatory for all tax-registered customers (individuals and organizations). The PAN must be valid and verifiable through the official government PAN database. Used for tax reporting, invoice validation, and TDS/TCS compliance.

~~D. Collect Thai customer tax related information~~

Field Name	Field Description	Rule
KUNNR	Customer Number	Mandatory Key link to Customer master table KNA1. Prepopulate the customer number for Thai customer only

NAME1	Customer Name	Display only link to Customer master table KNA1
BCODE	Branch Code	Indicates the Thai Revenue Department branch code used for input/output VAT reporting. Applicable only for domestic Thailand customers (Sold To, Ship To, Payer). Maintain '00000' for all domestic Thailand customers (default value). Not required for international/export customers, as the field impacts only Thai VAT reporting. Upon business request, the value may be updated to a specific branch code (00001-00009 / 00010).

E. Collect Customer Loading Points (KNVA)

Field Name	Field Description	Rule
CLIENT	System ID	Mandatory System ID with drop-down PF2 or WP2
KUNNR	Customer	Mandatory Unloading points will be required for specific Ship-To parties that have defined receiving days or limited goods receiving hours. The customer number here will be the SAP ECC Customer number
ABLAD	Unloading Point	Mandatory It follows below pattern <CustomerCode>_<Location>
KNFAK	Cust.fact. calendar	Optional Customer's factory calendar Specifies the factory calendar that the customer uses. The factory calendar determines the workdays on which business can be transacted (for example, the days on which the customer can receive deliveries).
WANID	Goods receiving hrs	Optional Goods receiving hours ID (default value) Identifies a schedule of goods receiving hours. Use You can create different schedules according to the unloading requirements of your customers. You can specify a schedule for each unloading point at the customer's site in the customer master record of the ship-to party. During automatic delivery processing, the system proposes delivery dates based on the following information: The schedule of goods receiving hours The customer's factory calendar
TPQUA	Means of Transp. Qualification	Optional
TPGRP	Means of Transport Group	Optional
STZKL	Wait Time Class (Factor, Var. Portion)	Optional
STZZU	Wait Time Surcharge (Fixed Portion)	Optional

MOAB1	Monday morning from ...	Optional Goods receipt times: Monday morning from ...
MOB11	Monday morning until ...	Optional Goods receiving hours: Monday morning until ...
MOAB2	Monday afternoon from ...	Optional Goods receipt times: Monday afternoon from ...
MOB12	Monday afternoon until ...	Optional Goods receiving hours: Monday afternoon until ...
DIAB1	Tuesday morning from ...	Optional Goods receipt times: Tuesday morning from ...
DIB11	Tuesday morning until ...	Optional Goods receiving hours: Tuesday morning until ...
DIAB2	Tuesday afternoon from ...	Optional Goods receipt times: Tuesday afternoon from ...
DIB12	Tuesday afternoon until ...	Optional Goods receiving hours: Tuesday afternoon until ...
MIAB1	Wednesday morning from ...	Optional Goods receipt times: Wednesday morning from ...
MIB11	Wednesday morning until ...	Optional Goods receiving hours: Wednesday morning until ...
MIAB2	Wednesday afternoon from ...	Optional Goods receipt times: Wednesday afternoon from ...
MIB12	Wednesday afternoon until ...	Optional Goods receiving hours: Wednesday afternoon until ...
DOAB1	Thursday morning from ...	Optional Goods receipt times: Thursday morning from ...
DOB11	Thursday morning until ...	Optional Goods receiving hours: Thursday morning until ...
DOAB2	Thursday afternoon from ...	Optional Goods receipt times: Thursday afternoon from ...
DOB12	Thursday afternoon until ...	Optional Goods receiving hours: Thursday afternoon until ...
FRAB1	Friday morning from ...	Optional Goods receipt times: Friday morning from ...
FRB11	Friday morning until ...	Optional Goods receiving hours: Friday morning until ...
FRAB2	Friday afternoon from ...	Optional Goods receipt times: Friday afternoon from ...
FRB12	Friday afternoon until ...	Optional Goods receiving hours: Friday afternoon until ...

SAAB1	Saturday morning from ...	Optional Goods receipt times: Saturday morning from ...
SABI1	Saturday morning until ...	Optional Goods receiving hours: Saturday morning until ...
SAAB2	Saturday afternoon from ...	Optional Goods receipt times: Saturday afternoon from ...
SABI2	Saturday afternoon until ...	Optional Goods receiving hours: Saturday afternoon until ...
SOAB1	Sunday morning from ...	Optional Goods receipt times: Sunday morning from ...
SOBI1	Sunday morning until ...	Optional Goods receiving hours: Sunday morning until ...
SOAB2	Sunday afternoon from ...	Optional Goods receipt times: Sunday afternoon from ...
SOBI2	Sunday afternoon until ...	Optional Goods receiving hours: Sunday afternoon until ...
DEFAB	Default unloading pt	Optional Default unloading point Specifies an unloading point as the default. Use When you enter more than one unloading point for a customer, you can select one unloading point as the default. During sales order processing, the system prompts you to choose one unloading point. The system presents the default unloading point as the first choice in the pop-up window.

F. Customer general - General Data (Intercompany customer and any new customer outside of ECC)

For customer general data, for Intercompany BP scenario, the value will be prepopulated based on the enterprise structure. A mapping of the new Intercompany BP and legacy ECC intercompany customer/vendor will be provided to propose the baseline values.

Field Name	Field Description	Rule
KUNNR	Customer Number	Customer Number* Key fields are mandatory and must always be filled with a unique key. If there is internal numbering, you can provide the key of your source system or any other unique key. The key is technically mandatory for the tool to internally connect the records of subordinated sheets with the records of the superordinate sheets.
BU_GR OUP	BP Grouping	BP Grouping* BU_GROUP: BP02 NRRNG: 02 From No: 0001000000 To Number: 0009999999 Ext: BU_GROUP: BPAB NRRNG: AB From No: A To Number: ZZZZZZZZZZ Ext: X
NAME1	Name	Name If you want to create an organization, enter the first name of your account organization. All fields for Account Person must be empty.

NAME_ORG2	Name 2	Name 2 Second name field for business partners in the Organization category. All fields for Account Person must be empty.
BU_SORT1	Search Term 1	Search Term 1 Denotes the term that you define for a business partner, and via which you can restrict the search for a business partner in the business partner search or in the locator.
BPKIND	BP Type	BP Type You can use the business partner type to group business partners according to your own criteria. You can show or hide fields for data entry, depending on the requirements of the relevant business partner type.
LIFNR	Supplier	Supplier
VBUND	Trading Partner	Trading Partner, Mandatory for ICT/ICN* BP *20260121 Update
WERKS	Plant	Mandatory For PL* BP only *20260121 Update
BPEXT	External BP Number	External BP Number Business partner number from an external system or a legacy system. If the current business partner is known under a different number in an external system, you can store this number here for information purposes.
KUKLA	Customer Classific.	Customer Classific. * updated on 20260128. this field is in use after checking with function team again
SUFRA MA	Suframa Code	Suframa Code This field identifies the Suframa registration number. This number is an identification of companies that operate in Zona Franca de Manaus (Manaus Trade Free Zone). The companies get this number through a process to make them eligible for tax incentives, benefits and auditing sections with the government.
RG	RG Number	RG Number Identifies the RG (Registro Geral) number.
EXP	Issued By	Issued By
UF	State	State
RGDATE	RG Issuing Date	RG Issuing Date
RNE	Foreign National Registration	Foreign National Registration Identifies the foreign national registration number.
RNEDA TE	RNE Issuing Date	RNE Issuing Date Identifies the foreign national registration issuing date. Type: Date
CRTN	CRT Number	CRT Number Identifies the Tax Regimen Code. The Tax Regimen Code (Código de Regime Tributário), depending on the company and its tributary situation, can be classified as Simples Nacional, Simples Nacional – excesso de sublimite da receita bruta and Regime Normal (não simples).

ICMST AXPAY	ICMS Taxpayer	ICMS Taxpayer Identifies the company's category for ICMS payment. The Brazilian government charges ICMS differently according to the type of taxpayer. Companies are classified as Contribuinte (ICMS Taxpayer) and Não Contribuinte (ICMS Non-Taxpayer).
INDTYP	Industry Main Type	Industry Main Type Identifies the Industry Main Type.
TDT	Tax Declaratio n Type	Tax Declaration Type Identifies the type of ICMS paid by the company to the Brazilian government.
COMSI ZE	Company Size	Company Size Identifies the company's size according to the number of employees and the annual sales revenue. Possible company sizes are: Large company Medium company Small company Micro company Micro entrepreneur
DECRE GPC	Declaratio n Regimen for PIS /COFINS	Declaration Regimen for PIS/COFINS Identifies the Declaration Regimen for PIS/COFINS. You use this field to classify the Declaration Regimen for PIS/COFINS according to the following values: RC - Regime Cumulativo (Cumulative Regimen) RN - Regime Não Cumulativo (Non-Cumulative Regimen)
J_1IPA NNO	Permanen t Account Number	Permanent Account Number Specifies the organization's Permanent Account Number.
GST_T DS	GST TDS Registratio n Number	GST TDS Registration Number
J_1KFT BUS	Type of Business	Type of Business Enter the type of business that this company is in. This information is printed on tax invoices and on the VAT summary report.
J_1KFT IND	Type of Industry	Type of Industry Enter the type of industry that this company is in. This information is printed on tax invoices and on the VAT summary report.
J_1KFR EPRE	Name of Represent ative	Name of Representative This information must be entered on Korean tax invoices.
STREET	Street	Street Street name as part of the address.
HOUSE _NUM1	House Number	House Number House number as part of an address.

CITY2	District	District City or District supplement. In some countries/regions, this entry is appended with a hyphen to the city name by the automatic address formatting, in other countries/regions, it is output on a line of its own or (for example in the USA) not printed.
POST_CODE1	Postal Code	Postal Code Postal code as part of the address.
CITY1	City	City City name as part of the address.
COUNTRY	Country/Region	Country/Region* The country/region key contains information which the system uses to check entries such as the length of the postal code or bank account number.
UF Region *updated on 20260130	State	State In some countries/regions, the region forms part of the address. The meaning depends on the country/region. The automatic address formatting function prints the region in addresses in the USA, Canada, Italy, Brazil or Australia, and the county/region in Great Britain.
TIME_ZONE	Time Zone	Time Zone Time zone as part of an address. The time zone is automatically determined by the system in address maintenance if time zone Customizing is maintained. It depends on the country/region and the region. (Region means state, province or county, depending on the country/region). The automatic determination is only made if there is no value in the time zone field.
TRANSPORT_ZONE	Transportation Zone	Transportation Zone Transportation zone to or from which the goods are delivered
NAME_CO	C/O Name	C/O Name Part of the address (c/o = care of) if the recipient is different from the occupant and the names are not similar (for example subtenants). Put the localization-specific code (for example c/o) in front of the name of the occupant. This is not automatically done in the print format, like the language-specific word "PO Box". Example: John Smith c/o David Brown
STR_SUPPL1	Street 2	Street 2 Additional address field which is printed above the Street line. The Street address contains two lines above the street and two lines below the street.
STR_SUPPL2	Street 3	Street 3 Additional address field which is printed above the Street line. The Street address contains two lines above the street and two lines below the street.

HOUSE_NUM2	Supplement	<p>Supplement</p> <p>House number supplement as part of an address, for example Apartment 17 or Suite 600. It is printed in the Street line. Further Street supplements can be put in one of the fields Street2, Street3, Street4 or Street5.</p>
TAXJURCODE	Tax Jurisdiction Code	<p>Tax Jurisdiction Code</p> <p>Max. length of input must not exceed 15 digits.</p> <p>The tax jurisdiction is used for determining the tax rate. It defines to which tax authorities you must pay your taxes. It is always the city to which the goods are supplied.</p> <p>If Vertex is activated (esp. on US installations) the tax jurisdiction code will be determined by the business object's address. If the given postal code/Zip code is not accurate as possible, Vertex will determine more than one tax jurisdiction code for one record, the migration of this record will fail. You will then get the error message "No unique jurisdiction code can be determined".</p>
PO_BOX	PO Box	<p>PO Box</p> <p>PO Box number as part of an address.</p> <p>Only enter the PO Box number in this field. The text "PO Box" is provided in the recipient language by the system when you print the address.</p>
POST_CODE2	Postal Code	<p>Postal Code</p> <p>Postal code that is required for a unique assignment of the PO box.</p> <p>This field is used for countries/regions where a different postal code applies to mail that is sent to the PO box rather than to the street address of a particular business partner.</p>
PO_BOX_CITY	PO Box City	<p>PO Box City</p> <p>Different city for the PO Box as an address component.</p> <p>The PO Box city can be entered here if it is different from the address city. If the address is only a PO Box address, enter the city in the normal city field.</p>
POST_CODE3	Company Postal Code	<p>Company Postal Code</p> <p>Postal code that is assigned directly to one company (= company postal code = major customer postal code).</p> <p>This field is used for countries/regions where major companies are assigned their own postal code by the national post office.</p>
BU_LANGUAGE	Language	<p>Language</p> <p>Communication language for business partners in the 'Organization' category.</p> <p>This field will be ignored if the business partner is from category 'Person', for category 'Organization' this field is mandatory.</p>
TELEPHONE	Telephone	<p>Telephone</p> <p>Default telephone number, consisting of dialing code and number, but without country/region dialing code.</p>
TELEPHONE2	Additional Telephone 2	<p>Additional Telephone 2</p> <p>Additional telephone number, consisting of dialing code and number, but without country/region dialing code.</p>
REMARK	Notes Additional Telephone 2	<p>Notes Additional Telephone 2</p> <p>You can maintain further information about the communication connection here. In the case of telephone numbers, for example, you can maintain the times at which the call recipient is available and those at which they are not, or you can specify whether the number is that of the secretary.</p>

TEL_N UMBER	Additional Telephone 3	Additional Telephone 3 Additional telephone number, consisting of dialing code and number, but without country/region dialing code.
REMARK	Notes Additional Telephone 3	Notes Additional Telephone 3 You can maintain further information about the communication connection here. In the case of telephone numbers, for example, you can maintain the times at which the call recipient is available and those at which they are not, or you can specify whether the number is that of the secretary.
TEL_N UMBER	Mobile	Mobile Default mobile number, consisting of dialing code and number, but without country/region dialing code.
REMARK	Notes Mobile	Notes Mobile You can maintain further information about the communication connection here. In the case of telephone numbers, for example, you can maintain the times at which the call recipient is available and those at which they are not, or you can specify whether the number is that of the secretary.
TEL_N UMBER	Additional Mobile 2	Additional Mobile 2 Additional mobile number, consisting of dialing code and number, but without country/region dialing code.
REMARK	Notes Additional Mobile 2	Notes Additional Mobile 2 You can maintain further information about the communication connection here. In the case of telephone numbers, for example, you can maintain the times at which the call recipient is available and those at which they are not, or you can specify whether the number is that of the secretary.
TEL_N UMBER	Additional Mobile 3	Additional Mobile 3 Additional mobile number, consisting of dialing code and number, but without country/region dialing code.
REMARK	Notes Additional Mobile 3	Notes Additional Mobile 3 You can maintain further information about the communication connection here. In the case of telephone numbers, for example, you can maintain the times at which the call recipient is available and those at which they are not, or you can specify whether the number is that of the secretary.
FAX_N UMBER	Fax	Fax Default fax number, consisting of dialing code and number, but without country/region dialing code.
REMARK	Notes Fax	Notes Fax You can maintain further information about the communication connection here. In the case of telephone numbers, for example, you can maintain the times at which the call recipient is available and those at which they are not, or you can specify whether the number is that of the secretary.
FAX_N UMBER	Additional Fax 2	Additional Fax 2 Additional fax number, consisting of dialing code and number, but without country/region dialing code.

REMARK	Notes Additional Fax 2	Notes Additional Fax 2 You can maintain further information about the communication connection here. In the case of telephone numbers, for example, you can maintain the times at which the call recipient is available and those at which they are not, or you can specify whether the number is that of the secretary.
FAX_NUMBER	Additional Fax 3	Additional Fax 3 Additional fax number, consisting of dialing code and number, but without country/region dialing code.
REMARK	Notes Additional Fax 3	Notes Additional Fax 3 You can maintain further information about the communication connection here. In the case of telephone numbers, for example, you can maintain the times at which the call recipient is available and those at which they are not, or you can specify whether the number is that of the secretary.
SMTP_ADDR	Email	Email Default internet mail address, also called e-mail address. Example: user.name@company.com
REMARK	Notes Email	Notes Email You can maintain further information about the communication connection here. In the case of telephone numbers, for example, you can maintain the times at which the call recipient is available and those at which they are not, or you can specify whether the number is that of the secretary.
SMTP_ADDR	Additional Email 2	Additional Email 2 Additional internet mail address, also called e-mail address. Example: user.name@company.com
REMARK	Notes Additional Email 2	Notes Additional Email 2 You can maintain further information about the communication connection here. In the case of telephone numbers, for example, you can maintain the times at which the call recipient is available and those at which they are not, or you can specify whether the number is that of the secretary.
SMTP_ADDR	Additional Email 3	Additional Email 3 Additional internet mail address, also called e-mail address. Example: user.name@company.com
REMARK	Notes Additional Email 3	Notes Additional Email 3 You can maintain further information about the communication connection here. In the case of telephone numbers, for example, you can maintain the times at which the call recipient is available and those at which they are not, or you can specify whether the number is that of the secretary.
SPERR	Central Posting Block	Central Posting Block This is an indicator field. If the criterion is met, enter X. If not, leave the field empty.
WERKS		

Field Name	Field Description	Rule
KU NNR	Customer Number	Customer Number*
#N /A	External Address Number	External Address Number If you assign multiple addresses to 1 business partner, the field External Address Number is mandatory. If you assign only address data on sheet General Data you can leave this field empty. The External Address Number must be unique for each business partner only. You can use the same External Address Number for different business partners.
NA TION	Version ID for International Addresses	Version ID for International Addresses* You can maintain addresses in multiple versions. In this way, addresses can be stored in the system in different international display formats (such as Kanji or Latin letters).
NA ME1	Name	Name If you want to create an organization, enter the first name of your account organization. All fields for Account Person must be empty.
NA ME _O RG2	Name 2	Name 2 Second name field for business partners in the Organization category. All fields for Account Person must be empty.
BU _S OR T1	Search Term 1	Search Term 1 Denotes the term that you define for a business partner, and via which you can restrict the search for a business partner in the business partner search or in the locator.
ST RE ET	Street	Street Street name as part of the address.
HO US E_ NU M1	House Number	House Number House number as part of an address.
CIT Y2	District	District City or District supplement. In some countries/regions, this entry is appended with a hyphen to the city name by the automatic address formatting, in other countries/regions, it is output on a line of its own or (for example in the USA) not printed.
HO ME _CI TY	Different City	Different City City of residence which is different from the postal city. In some countries/regions, the residential city is required if it differs from the postal city. In the USA, the official street indexes, against which data can be checked, are based on the residential city, not the postal city, which may be different.

CITY1	City	City City name as part of the address.
#N/A	Building	Building Number or abbreviation of a building in an address. This field is not used when the address is printed. The name of a building such as "Empire State Building", which is also to appear in the printout of the address, must be stored above or below the street in one of the fields Street2, Street3, Street4 or Street5, depending on its position.
FL OOR	Floor	Floor Floor of the building as more exact specification of an address. This field is not printed in the address.
NAME_CO	C/O Name	C/O Name Part of the address (c/o = care of) if the recipient is different from the occupant and the names are not similar (for example subtenants). Put the localization-specific code (for example c/o) in front of the name of the occupant. This is not automatically done in the print format, like the language-specific word "PO Box". Example: John Smith c/o David Brown
STR_SU_PP_L1	Street 2	Street 2 Additional address field which is printed above the Street line. The Street address contains two lines above the street and two lines below the street.
STR_SU_PP_L2	Street 3	Street 3 Additional address field which is printed above the Street line. The Street address contains two lines above the street and two lines below the street.
HOUSE_NUM2	Supplement	Supplement House number supplement as part of an address, for example Apartment 17 or Suite 600. It is printed in the Street line. Further Street supplements can be put in one of the fields Street2, Street3, Street4 or Street5.
PO_BOX_CITY	PO Box City	PO Box City Different city for the PO Box as an address component. The PO Box city can be entered here if it is different from the address city. If the address is only a PO Box address, enter the city in the normal city field.

H - Customer general - Bank Data (Intercompany customer and any new customer outside of ECC)

Field Name	Field Description	Rule
KUNNR	Customer Number	Customer Number*

KBAN KS	Bank Country /Region	Bank Country/Region Identifies the country/region in which the bank is located. The country/region key defines the rules according to which bank data, such as the bank and account number, is to be validated.
KBAN KL	Bank Key	Bank Key In this field, you specify the bank key under which bank data from the respective country/region is stored. The length of bank key is decided on bank country/region. For example, if bank country/region is DE, length of bank key must have length 8; if bank country/region is IT, length of bank key must have length 10.
ACC OUN T_ID	Account (Acc. No. or IBAN)	Account (Acc. No. or IBAN)
IBAN	IBAN	IBAN
BKO NT	Bank Control Key	Bank Control Key This field contains a key for checking the combination of bank number and bank account number or to determine the type of account. Please check the SAP online documentation for further details and a list of localization-specific examples.
KOINH	Account Holder Name	Account Holder Name
ACC NAME	Account Name	Account Name
BKREF	Reference Details	Reference Details
XEZER	Collection Authorization Indicator	Collection Authorization Indicator This is an indicator field. If the criterion is met, enter X. If not, leave the field empty.

i - Customer general - Tax Numbers (Intercompany customer and any new customer outside of ECC)

Field Name	Field Description	Rule
KUNNR	Customer Number	Customer Number*
TAXT YPE	Tax Number Category	Tax Number Category* Distinguishes between different sorts of tax numbers, for example, in the United States, the social security number and the corporate ID number; or in Europe, the VAT registration number.
TAXN UM	Tax Number	Tax Number* Enter the identification number issued by the tax authorities to taxpayers.

J - Customer general - Identification Numbers (Intercompany customer and any new customer outside of ECC)

Field Name	Field Description	Rule
KUNNR	Customer Number	Customer Number*
TYPE	Identification Type	Identification Type* Enter the type of the identification like Dun & Bradstreet Number, Global Location Number, and so on.
IDNUMBER	Identification Number	Identification Number* Number that serves to uniquely identify a business partner, such as Dun & Bradstreet Number, Global Location Number, and so on.

K. Collect Customer Classification

Field Name	Field Description	Rule
KUNNR	Customer Number	Mandatory Key link to Customer master table KNA1.
NAME1	Customer Name	Display only link to Customer master table KNA1
KUKLA	Customer classification	Allowed list 01 – Industry (End-User): Direct customers who buy and use Syensqo products. 02 – Trade (Trader): Entities handling internal or raw-material trade flows. 03 – Distribution (Distributor / Reseller): Distributors or resellers who buy Syensqo products and sell them to their own customers or act as agents. 04 – Service Provider: Consultants, testing laboratories, or entities providing only services (no goods invoiced, e.g., freight or compensation). 05 – Joint Venture: Entities in which Syensqo holds a partnership or ownership interest, involved in joint operations or projects. 06 – Competitor (if configured): Companies competing in the same market segment as Syensqo.
TEXT40	Customer classification Description	Display only

DCT_VendorGeneral	WERKS	Plant	Must be a valid plant in T001W
DCT_VendorGeneral	VBUND	Company ID of trading partner	Must be a valid ID in T880
Address Data			
DCT_Vendor_ADRC	PARTNER	BUSINESS PARTNER	DCT Key from General Data
DCT_Vendor_ADRC	SEQNO	SEQUENCE NUMBER	DCT Key sequence number
DCT_Vendor_ADRC	STR_SUPPL1	STREET 2	Must not exceed 40 chars
DCT_Vendor_ADRC	STR_SUPPL2	STREET 3	Must not exceed 40 chars

DCT_Vendor_ADRC	STREET	STREET NAME	Must not exceed 60 chars (Required)
DCT_Vendor_ADRC	HOUSE_NUM2	SUPL	Must not exceed 10 chars
DCT_Vendor_ADRC	STR_SUPPL3	STREET 4	Must not exceed 40 chars
DCT_Vendor_ADRC	LOCATION	STREET 5	Must not exceed 40 chars
DCT_Vendor_ADRC	CITY2	DISTRICT	Must not exceed 40 chars
DCT_Vendor_ADRC	POST_CODE1	POSTAL CODE	Must not exceed 10 chars (Required)
DCT_Vendor_ADRC	CITY1	CITY	Must not exceed 40 chars (Required)
DCT_Vendor_ADRC	COUNTRY	COUNTRY	Must be a valid country in T005 (Required)
DCT_Vendor_ADRC	REGION	REGION	Must be a valid region in T005S (Required)
DCT_Vendor_ADRC	NATION	NATION	Must be a valid Nation in TSADV
DCT_Vendor_ADRC	TIME_ZONE	TIME ZONE	Must be a valid timezone in TTZZ
DCT_Vendor_ADRC	TAXJURCODE	TAX JURISDICTION	Must not exceed 15 chars
DCT_Vendor_ADRC	TRANSPZONE	TRANSPORTATION ZONE	Must be a valid transpzone in TZONE
DCT_Vendor_ADRC	PO_BOX	PO BOX	Must not exceed 10 chars
DCT_Vendor_ADRC	PO_BOX_NUM	PO BOX W/O NO.	X or blank
DCT_Vendor_ADRC	PO_BOX_LOBBY	PO BOX LOBBY	Must not exceed 40 chars
DCT_Vendor_ADRC	POST_CODE2	POSTAL CODE	Must not exceed 10 chars
DCT_Vendor_ADRC	PO_BOX_LOC	OTHER CITY	Must not exceed 40 chars
DCT_Vendor_ADRC	PO_BOX_CTY	OTHER COUNTRY	Must not exceed 40 chars
DCT_Vendor_ADRC	PO_BOX_REG	OTHER REGION	Must be a valid region in T005S
DCT_Vendor_ADRC	POST_CODE3	COMPANY POSTAL CODE	Must not exceed 10 chars
DCT_Vendor_ADRC	LANGU	LANGUAGE	Must be a valid language in T002 (Required)
DCT_Vendor_ADRC	TEL_NUMBER	TELEPHONE	Must not exceed 30 chars and must be numeric
DCT_Vendor_ADRC	TEL_EXTENS	EXTENSION	Must not exceed 10 chars and must be numeric
DCT_Vendor_ADRC	REMARK	COMMENTS	Must not exceed 50 chars
DCT_Vendor_ADRC	FAX_NUMBER	FAX	Must not exceed 30 chars and must be numeric
DCT_Vendor_ADRC	FAX_EXTENS	EXTENSION	Must not exceed 10 chars and must be numeric
DCT_Vendor_ADRC	DEFLT_COMM	STANDARD METHOD	Must be a valid method inTSAC
Telephone Data			
DCT_Vendor_Tel	PARTNER	BUSINESS PARTNER	DCT Key from General Data
DCT_Vendor_Tel	SEQNO	SEQUENCE NUMBER	DCT Key sequence number
DCT_Vendor_Tel	DFT_RECEIV	SMS -ENABLED	X or blank
DCT_Vendor_Tel	FLG_NOUSE	DO NOT USE	X or blank
DCT_Vendor_Tel	VALID_FROM	VALID FROM	Must be a valid date
DCT_Vendor_Tel	VALID_TO	VALID TO	Must be a valid date
DCT_Vendor_Tel	FLGDEFAULT	DEFAULT	X or blank
DCT_Vendor_Tel	R3_USER	MOBILE INDICATOR	1,2,3, or X
DCT_Vendor_Tel	TEL_NUMBER	TELEPHONE	Must not exceed 30 chars and must be numeric
DCT_Vendor_Tel	TEL_EXTENS	EXTENSION	Must not exceed 10 chars and must be numeric
DCT_Vendor_Tel	COUNTRY	COUNTRY	Must be a valid country in T005
Email Data			
DCT_Vendor_Email	PARTNER	BUSINESS PARTNER	DCT Key from General Data
DCT_Vendor_Email	SEQNO	SEQUENCE NUMBER	DCT Key sequence number
DCT_Vendor_Email	SMTP_ADDR	E-MAIL	Must be a valid email
Vendor ID Data			
DCT_Vendor_ID	PARTNER	BUSINESS PARTNER	DCT Key from General Data
DCT_Vendor_ID	TYPE	ID TYPE	DCT Key and must be a valid ID type in TB039A

DCT_Vendor_ID	IDNUMBER	IDENTIFICATION NUMBER	DCT Key and must not exceed 60 chars
DCT_Vendor_ID	INSTITUTE	RESPONSIBLE INSTITUTION	Must not exceed 40 chars and legacy value mapped to S4
DCT_Vendor_ID	ENTRY_DATE	ENTRY DATE	Must be a valid date (Default to Creation Date)
DCT_Vendor_ID	VALID_DATE_FROM	VALID FROM	Must be a valid date (Default to Creation Date)
DCT_Vendor_ID	VALID_DATE_TO	VALID TO	Must be a valid date (Default to 99991231)
DCT_Vendor_ID	COUNTRY	COUNTRY	Must be a valid country in T005
DCT_Vendor_ID	REGION	REGION	Must be a valid region in T005S
Tax Data			
DCT_Vendor_Tax	PARTNER	BUSINESS PARTNER	DCT Key from General Data
DCT_Vendor_Tax	TAXTYPE	CATEGORY	DCT Key and must be a valid category in TFKTAXNUMTYPE_C
DCT_Vendor_Tax	TAXNUM	TAX NUMBER	Must not exceed 20 chars
DCT_Vendor_Tax	TAX_CTY	COUNTRY/REGION	Must be a valid Tax Country in TB071
DCT_Vendor_Tax	TAX_REG	REGION	Must be a valid region in T005S
DCT_Vendor_Tax	TAX_TYPE	TAX TYPE	Must be a valid Tax Type in TB071
DCT_Vendor_Tax	TAX_GROUP	BUSINESS PARTNER TAX GROUP	Must be a valid Tax Group in TB071
Bank Data			
DCT_Vendor_Bank	PARTNER	BUSINESS PARTNER	DCT Key from General Data
DCT_Vendor_Bank	BKVID	ID (BANK DETAILS)	DCT Key and must not exceed 4 chars
DCT_Vendor_Bank	BANKS	BANK COUNTRY	Must be a valid country in T005
DCT_Vendor_Bank	BANKL	BANK KEY	Must not exceed 15 chars and legacy value mapped to S4
DCT_Vendor_Bank	BANKN	BANK ACCOUNT	Must not exceed 18 chars
DCT_Vendor_Bank	BKONT	CONTROL KEY	Must not exceed 2 chars
DCT_Vendor_Bank	IBAN	IBAN	Must not exceed 34 chars
DCT_Vendor_Bank	BK_VALID_FROM	VALID FROM	Must be a valid date
DCT_Vendor_Bank	BKREF	REFERENCE DETAILS	Must not exceed 20 chars
DCT_Vendor_Bank	BKEXT	EXTERNAL ID	Must not exceed 20 chars
DCT_Vendor_Bank	XEZER	COLLECTION AUTHORISATION	X or blank
DCT_Vendor_Bank	KOINH	ACCOUNT HOLDER	Must not exceed 60 chars
DCT_Vendor_Bank	ACCNAME	ACCOUNT NAME	Must not exceed 40 chars
DCT_Vendor_Bank	BK_VALID_TO	VALID TO	Must be a valid date
DCT_Vendor_Bank	BVTYP	PARTNER BANK TYPE	Must not exceed 4 chars (Required)
DCT_Vendor_Bank	EBPP_BVSTATUS	STATUS OF BANK DETAILS IN BILLER DIRECT	A, B, C, D, or blank
Vendor Status			
DCT_Vendor_Status	PARTNER	BUSINESS PARTNER	DCT Key from General Data
DCT_Vendor_Status	STAT	STATUS	DCT Key status and must not exceed 5 chars
DCT_Vendor_Status	STSMA	STATUS PROFILE	Must be a valid profile in TJ20

Extraction Dependencies

Item #	Step Description	Team Responsible
1	Source System Availability <ul style="list-style-type: none"> Ensure that the source database or application is accessible. Confirm that necessary credentials and permissions are granted 	Syensqo IT

2	Data Structure <ul style="list-style-type: none"> Identify relationships between tables, views, and stored procedures. 	Syniti
3	Referential Integrity <ul style="list-style-type: none"> Ensure dependent records are extracted together. 	Syniti
4	Extraction Methodology <ul style="list-style-type: none"> Define whether extraction is full, incremental, or delta-based. Establish batch processing schedules for large datasets. 	Syniti
5	Performance and Scalability Considerations <ul style="list-style-type: none"> Optimize extraction queries to prevent system overload. Ensure network bandwidth supports data transfer volumes. 	Syniti
6	Security and Compliance <ul style="list-style-type: none"> Adhere to regulatory standards for sensitive information if applicable 	Syniti

Transformation

The Target fields are mapped to the applicable Legacy field that will be its source, this is a 3-way activity involving the Business, Functional team and Data team. This identifies the transformation activity required to allow Syniti Migrate to make the data Target ready:

- Perform value mapping and data transformation rules.
 - Legacy values are mapped to the to-be values (this could include a default value)
 - Values are transformed according to the rules defined in Syniti Migrate
- Prepare target-ready data in the structure and format that is required for loading via prescribed Load Tool. This step also produces the load data ready for business to perform Pre-load Data Validation

Transformation Run Sheet

Item #	Step Description	Team Responsible
1	Identify target S/4HANA fields and determine applicable legacy source fields from both ECC systems WP2, PF2	Functional Team (L2C/S2P)+ Data Team (L2C/S2P)
2	Map legacy field values to S/4HANA target values (including field-level mapping and technical names)	Data Team (L2C/S2P), Data Team (Syniti)
3	Define value mapping rules for fields requiring standardization or harmonization across the two source systems WP2, PF2	Functional Team (L2C/S2P)+ Data Team (L2C/S2P)
4	Identify and agree on default values where legacy data is incomplete or inconsistent	Business Team + Functional Team (L2C /S2P)
5	Configure transformation rules in Syniti Migrate	Data Team (Syniti)–
6	Review transformation logic and mappings with Business for confirmation	Business Team + Functional Team (L2C /S2P)
7	Perform initial transformation run and generate draft target-ready dataset	Data Team (Syniti),
8	Review draft target-ready data for structure and completeness	Data Team (L2C/S2P), Functional Team (L2C/S2P)
9	Share transformed data with Business for Pre-load Validation	Business Team
10	Incorporate feedback from Business and refine mappings or transformation logic as needed	Data Team (L2C/S2P)
11	Finalize and approve transformed data as Target Ready Load File	Business + Functional (L2C/S2P) + Data Team (L2C/S2P)
12	Handover final file to Load Team or trigger the load via Syniti Load Workbench	Data Team (Syniti), Data Load Team

Transformation Rules

Customer Master Data Transformation Rule

Rule #	Source system	Source Table	Source Field	Source Description	Target System	Target Table	Target Field	Target Description	Transformation Logic
1	WP2/PF2	KNA1	KUNNR	Business Partner	S4 Hana	BUT000	PARTNER	Business Partner	Rule - For External BP Apply external number range from 1000000 to 99999999, t For Intercompany BP, it will be DCT, the numbering will be Legal entity will be ICT/ICN+S4 Company Code Plant will be PL/PY+S4 Plant code The number range assigned to the BP will be fixed in differ
2	WP2/PF2			BP Type	S4 Hana	BUT000	BPKIND	BP Type	DCT - Only used for Agent. When it is Agent, apply value 9
3	WP2/PF2			Grouping	S4 Hana	BUT000	BU_GROUP	Grouping	Rule - For External BP - Apply BP02 For Intercompany BP - Apply BPAB
4	WP2/PF2	KNA1	KUNNR	External BP Number	S4 Hana	BUT000	BPEXT	External BP Number	Rule - if it is single, just copy legacy customer or vendor nu if there are multiple legacy number, use '/' to combine cus Rule - the primary BP Number if in case we find multiple BI maintained in the identification tab
5	WP2/PF2	ADRC	SORT1	Search Term 1	S4 Hana	BUT000	BU_SORT1	Search Term 1	Copy -

As deduplication/consolidation is performed for customer and vendor general data during migration, following fields will have special rule to ensure the complete information is migrated into S4 Hana system.

There will be 3 scenarios.

- a. Multiple customers are merged into 1 customer
- b. Multiple vendors are merged into 1 vendor
- c. One or several customer and vendor are merged into 1 BP in S4

6	WP2/PF2	ADR6	FLG_NOUSE HOME_FLAG SMTP_ADDR SMTP_SRCH	E-Mail Addresses (Business Address Services)	S4 Hana	ADR6	FLG_NOUSE HOME_FLAG SMTP_ADDR SMTP_SRCH		Merge all the different values
7	WP2/PF2	KNBK / LFBK	BANKS BANKL BANKN BKONT BKREF KOINH	Customer/Vendor Master (Bank Details)	S4 Hana	BUT0BK	BANKS BANKL BANKN BKONT BKREF KOINH		TBD
8	WP2/PF2	KNA1 /LFA1	STCEG/STCD1 /2/3/4/5/6	VAT/Tax ID	S4 Hana	DFKKBPT AXNUM	TAXNUM		Merge the values when it is blank in the master record

Transformation Mapping

[Transformation Mapping Document Link](#)

Mapping Table Name	Mapping Table Description
	Map ECC customer number to S4 Customer number
MAP_REGION	Country/Region Code Mapping Table
	Bank Key mapping
MAP_TDID_KNA1	KNA1 text ID mapping
MAP_CFOPC	Customer's CFOP category Mapping
MAP_TXLW1	Mapping ICMS Law
MAP_KTOKK	Vendor Account Group mapping
MAP_FITYP	Tax Type mapping
MAP_INDUS	Industry Sector mapping

Transformation Dependencies

List the steps that need to occur before transformation can commence

Item #	Step Description	Team Responsible
1	Source Data Integrity - Ensure extracted data & DCT is complete, accurate, and consistent. - Validate that data types and formats align with transformation requirements.	Syniti
2	Referential Integrity - Ensure dependent records are transformed together or in advance	Syniti
3	Transformation Logic and Mapping - Define data mapping rules between source and target schemas.	Data Team
4	Performance and Scalability Considerations - Optimize transformation processes for large datasets. - Ensure system resources can handle transformation workloads	Syniti
5	Logging and Error Handling - Maintain detailed logs of transformation activities. - Define error-handling procedures for failed transformations	Syniti

Pre-Load Validation

Project Team

The following pre-load validations will be performed by the Project Team.

Completeness

Task	Action
Compare Data Counts	<ol style="list-style-type: none">1. Verify row counts between source and target databases.2. Identify missing or duplicated records.
Validate the mandatory fields	Validate there is value for all the mandatory fields
Validate Primary Keys and Unique Constraints	<ol style="list-style-type: none">1. Check for duplicate or missing primary key values, i.e., if there is same BP number.2. Ensure unique constraints are maintained.
Test Referential Integrity	Confirm dependent records exist in related tables

Accuracy

Task	Action
Validate the transformation	Validate the fields which require transformation have the value after transformation instead of the original field value
Check Data Consistency	<ol style="list-style-type: none">1. Compare field values across systems2. Validate data formats and structures

Business

The following pre-load validations will be performed by the business.

Completeness

Task	Action
Compare Data Counts	<ol style="list-style-type: none"> 1. Verify row counts in the source databases. 2. Identify missing or duplicated records.
Review populated templates for missing or incorrect values	Use checklists to verify completeness and correctness before submission

Accuracy

Task	Action
Check Data Consistency	<ol style="list-style-type: none"> 1. Business Data Owner/s to verify that all the data in the load table/ file is accurate as per endorsed transformation/ mapping rules (and signed-off DCT data).

Load

The load process includes:

1. Execute the automated data load into target system using load tool or product the load file if the load must be done manually
2. Once the data is loaded to the target system, it will be extracted and prepared for Post Load Data Validation

Load Run Sheet

Item #	Step Description	Team Responsible
1	Confirm readiness of final approved data sets for each ECC source system WP2 and PF2	Business / Functional Team
2	Validate transformation rules and mappings in Syniti tool	Data Team (L2C/S2P-Data)
3	Generate target-ready load files based on S/4HANA BP table format	Data Team (Syniti)
4	Review and approve load files before execution	Business / Functional Team
5	Execute the custom loading program in the S/4HANA system	Data Load Team
6	Monitor load progress and capture load statistics (records loaded, errors, duplicates, etc.)	Data Team (Syniti) / Technical Team
7	Extract loaded data from S/4HANA for post-load validation	Data Team (Syniti)
8	Perform post-load data validation (compare target data with source/approved files) for all loaded BP general data	Data Team (L2C/S2P-Data)
9	Log and resolve any data load errors or mismatches identified during validation	Data Team (L2C/S2P-Data) + Functional Team + Syniti
10	Obtain business sign-off on successful load and validation	Business Team
11	Archive load logs, error reports, and validation results for audit/compliance	Data Team (L2C/S2P-Data) / Data Team (Syniti) / PMO

Load Phase and Dependencies

The Business Partner General will be loaded in the pre-cutover period.

Before loading, it will have dependency on the configuration. The configuration needs to be transported into the respective system first, including the manual configuration such as the BP number range set up.

Configuration

Item #	Configuration Item
1	BP Grouping
2	Customer/Vendor Account Group
3	International Version
4	Tax Category
5	BP Type
6	BP Number Range/Customer/Vendor Number range
7	Transportation zone
8	ID TYPE

Conversion Objects

Object #	Preceding Object Conversion Approach
1083	Bank Master

Error Handling

Error Type	Error Description	Action Taken
Configuration / Data Transformation	The value XXX for field XXX doesn't exist	<ol style="list-style-type: none"> 1. Check the mapping/conversion is done properly in the loading file 2. Validate the target value is configured/transported in the target system 3. Reach out to function team to validate the configuration
Configuration	There is mandatory field XXX missing	<ol style="list-style-type: none"> 1. Validate MDS if the fields are set as mandatory 2. Validate if there is value in the pre-loading file 3. Validate if the configuration for the mandatory fields are done properly
Configuration	The BP grouping is External or Internal Number range	<ol style="list-style-type: none"> 1. Validate the number range set up if this is External or Internal number range

Post-Load Validation

Project Team

The following post-load validations will be performed by the Project Team.

Completeness

Task	Action

Perform Source-to-Target Comparisons	<ol style="list-style-type: none"> 1. Validate that migrated data matches source records. 2. Check for discrepancies in numerical values, text fields, and timestamps
--------------------------------------	---

Accuracy

Task	Action
Execute Sample Queries and Reports	<ol style="list-style-type: none"> 1. Run queries to validate business logic. 2. Generate reports to compare expected vs. actual results
Conduct Post-Migration Reconciliation	Generate reports comparing pre- and post-migration data.

Business

Post-load validation is a critical step in data migration, ensuring that transferred data is accurate, complete, and functional within the target system.

1. Ensuring Data Integrity

After migration, data must be consistent with its original structure. Post-load validation checks for missing records, incorrect mappings, and formatting errors to prevent discrepancies.

2. Business Continuity

Faulty data can disrupt operations, leading to financial losses and inefficiencies. Validating post-load data ensures that applications function as expected, preventing downtime.

3. Error Detection and Resolution

By validating data post-migration, businesses can detect anomalies early, reducing the cost and effort required for corrections

Completeness

Task	Action
Perform Source-to-Target Comparisons	<ol style="list-style-type: none"> 1. Validate that migrated data matches source records. 2. Check for discrepancies in numerical values, text fields, and timestamps
Conduct Post-Migration Reconciliation	Go through reports comparing pre- and post-migration data.

Accuracy

Task	Action
Perform Manual Testing	Conduct manual spot-checks for additional assurance.

Key Assumptions

- BP Master Data Standard is up to date as on the date of documenting this conversion approach and data load.
- BP General (Role 000000) is in scope
- There will be 3 SAP instances, one for ROW, one for China and one for CUI only.
- BP General data will be loaded into all 3 SAP instances.
- There is no translation required for the Business Partner general data.

Change log

Version	Published	Changed By	Comment
CURRENT (v. 220)	Apr 27, 2026 08:28	CELEDONIO-ext, Arnold	
v. 219	Apr 24, 2026 15:27	RUAN-ext, Eric	*20260424 update remove the redundant relevancy rule
v. 218	Apr 21, 2026 13:36	CELEDONIO-ext, Arnold	Update Vendor mapping rules
v. 217	Apr 20, 2026 14:01	RUAN-ext, Eric	20260420 update for but100 to remove source and add ADR table without select
v. 216	Apr 06, 2026 10:14	CELEDONIO-ext, Arnold	
v. 215	Apr 02, 2026 14:51	RUAN-ext, Eric	
v. 214	Mar 31, 2026 16:16	RUAN-ext, Eric	
v. 213	Mar 30, 2026 10:35	CELEDONIO-ext, Arnold	
v. 212	Mar 30, 2026 10:23	CELEDONIO-ext, Arnold	
v. 211	Mar 26, 2026 14:24	RUAN-ext, Eric
