

WW IFRS 16 - Closure activities

Table of contents

1. Objective and Scope
 - a. Objective of this operation
 - b. Scope
2. Task description
 - a. Closure Activities
 - i. Foreign revaluation
 - ii. Reclassification trade payable to Finance Debt
 - iii. Flow reclassification (F31 to F30)
 - iv. Reclassification from Long term portion to Short term portion
 - v. Transfer Short Term Financial Debt to Operational Debt (Only local (P/L))
 - vi. Annulment of IFRS 16 amounts in statutory accounts

1 - Objective and Scope

Objective of these operations

The purpose of these tasks is to ensure that all activities are performed in order to guarantee the monthly IFRS 16 closure process.

NOTE: Please be aware that these tasks are performed automatically through FCC, however these guidelines are for when they need to be done manually.

Scope

This procedure is applied to all WW companies under IFRS 16.

2 - Task description

Closure Activities

Closure Activities need to be performed during D1 to D3

D1

1. Foreign revaluation (SAP transaction code **OBJVAL**) - The purpose of this task is to revalue at the functional currency (currency of the company code) the monthly valuation for contracts in foreign currency. As said this task is performed monthly and we should have always 2 postings, the revaluation posting in the closure period (*M-1*) and the reversal in the next period (*M*).

Fill in the required information, such as:

- Company Code
- Valuation Key Date: always the last day of the closure period (*M-1*)
- Valuation Area: always **LE** (*exceptions Brazil LB and Argentina LA*)
- Valuation Method: always **EVR**

Foreign Currency Valuation: Valuation Objects

1. Reclassification Trade payables to Financial Debt (SAP transaction code PF2: **Z1F_CAPEX_MONTHLY** | WP2: **ZWFA58002**) - The purpose of this task is to reclassify on a monthly basis the amounts in the vendor trade payables account to the vendor financial debt account for reporting purposes. As said this task is performed monthly and we should have always 2 postings, the reclassification posting in the closure period (*M-1*) and the reversal in the next period (*M*).

When you enter the transaction to perform the posting you should select the variant: **RC_TP_FD_AP_S**

You will obtain the following output:

Selection Screen

Company Code 3865 to

Fiscal Year 2020

Posting Period 5

Options

☐ Carry out the report comparison for asset suppliers and financial debts

☒ Create vendor OI reclassification to lease debt posting

Output Parameters

☐ Posting Required

☒ Test Simulation

☒ Process executed by SCMA

Document Type SA

Check one company at a time and run with test simulation in order to check if no error appears in the message.

The principal error that could appear is that one of the periods is closed. If this is the situation, open it before posting in order to process the pending items.

After checking the errors message and the open amounts in the transaction, check the open items (at the last day of the closure period) in **FBL3N** for the G/L account 56030160 (WP2) | 5112100070 (PF2) has any posting. If you have any values from previous months, further analysis to identify what document should be reversed is necessary.

If everything is okay, remove "test simulation" and run the transaction in real mode.

When refreshing **FBL3N** the amount must be the same of the Reclassification Trade Payable to Finance Debt posting.

2. Reclassification F31 to F30 (SAP transaction code PF2: **Z1F_IFRS_FLOW_CORR** | WP2: **ZWFA03B** with variant: **F31-F30_APAC_S**) - The purpose of this task is to reclassify on a monthly basis the amounts in flow F31 to flow F30 for reporting purposes (to report properly the cash out). As said this task is performed monthly and we should have always 2 postings, the reclassification posting in the closure period (M-1) and the reversal in the next period (M).

First you have to check the **F31** amounts in **FBL3N**, open transaction and select the IFRS 16 accounts

(Accounts for **PF2**: 5102100010, 5112100010, 5112100020, 5112100040, 5112100070 ---- Accounts for **WP2**: 16830100, 56030100, 56030110, 56030119, 56030120, 56030129, 56030160).

Check one company at the time and use all items from the beginning of the year to the last day of the closure month.

☐ Display the ST liability position per BFC activity 2
☒ Post the flow type correction
☐ Reverse flow type correction
☒ Test mode

Document type

Target LT liability account

Compare the data to be posted with the information per company that you have in **FBL3N**. The amounts must match.

Check the history in the transaction in order to review if there is any closed period that needs to be open or any other error.

BFC flow type correction - IFRS16

Exception	CoCode	Profit Center	G/L Assign.	DocumentNo	Item	Fiscal Yr	Currency	Σ	Net Value	Acr./Def. Doc.	Stat
	7424	0241-Z0449					USD	■	37.080,00	5050006254	
		0241-Z0449					USD	■ ■	37.080,00		
		0246-Z0449					USD	■	10.456,54	5050006256	
		0246-Z0449					USD	■ ■	10.456,54		
		0249-G0449					USD	■	15.222,80	5050006258	

If no errors and periods are open, return and remove the "test mode" and process the items.

After the transaction posting, refresh the **FBL3N** extraction and filter again the transaction type for **F31**.

All the company codes should have **F31** balanced.

3. Reclassification from Long term portion to Short term portion (SAP code transaction **OBJREG**) - The purpose of this task is to reclassify on a monthly basis the debt for the following 12 months from Long term portion to Short term portion. As said this task is performed monthly and we should have always 2 postings, the reclassification posting in the closure period (M-1) and the reversal in the next period (M).

Fill in the required information, such as:

- Company Code
- Valuation Key Date: always the last day of the closure period (M-1)
- Sort Method: always **ZL16**
- Valuation Area: always **LE** (exceptions Brazil **LB** and Argentina **LA**)

Please be aware that the system allows to run **OBJREG** as many times as possible, creating duplicated amounts. For this reason you should be careful to run it just once.

In case of duplication, the documents posted must be reversed.

4. Transfer ST Financial Debt to Operational Debt (Only local (P/L)) (**ZFI_DEBT_TRANSFER**) - The purpose of this task is to transfer monthly the IFRS financial debt affecting contracts, which didn't extend the IFRS16 in local GAAP (which post the lease costs to the P&L), back to the operational debt. This function is only related to the Short Term financial debt since the Long Term one is purely cancelled through **Z1ANNUL** annulment posting. As said this task is performed monthly and we should have always 2 postings, the reclassification posting in the closure period (*M-1*) and the reversal in the next period (*M*).

Go to transaction **ZFI_DEBT_TRANSFER** and select the variant *IFRS16 FRANCE*.

NOTE: This activity is performed **ONLY** for French companies.

1. [Annulment of IFRS 16 amounts in statutory accounts \(Z1AANNUL\)](#) - The purpose of this task is to cancel and correct the IFRS monthly financial debt affecting contracts, for both situations in Local GAAP (*Local (P/L)* - didn't extend the IFRS16 in local GAAP and post the lease costs to the P&L | *Local (BS)* - did extend the IFRS16 in local GAAP and post the lease costs to the BS).

To run **Z1AANNUL**, to verify if the different accounts are balanced, you have to fill fields with the required information (templates with pre-filled information can be found in the "*Variant Directory of Program Z1AANNUL*").

Use as charts of account COCA for PF2 and Z001 for WP2.

Run one company at a time, remembering to change the Country Key, based on the country identity of the company code (e.g.: company 0001 Belgium – country key BE; company 5835 Italy - country key IT, etc..) and in test run, remove the ticks on "CREATE BATCH-INPUT" and "SCMA".
